

# Quick Installation Guide

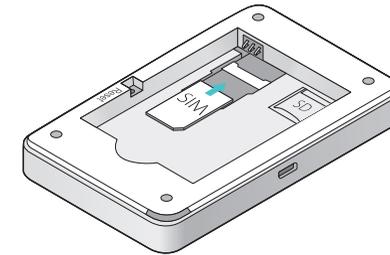

4G LTE Mobile Wi-Fi  
M7350

## Install the SIM Card and Battery

1 Remove the back cover.

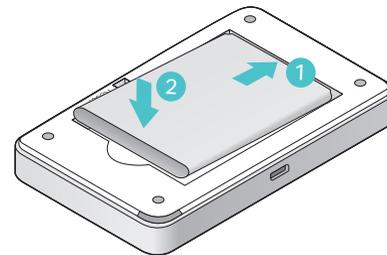

2 Insert the SIM card.

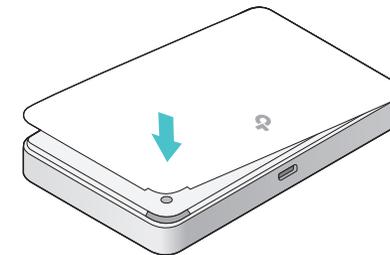

- Nano and micro SIM cards must be converted using the provided SIM card tray.
- The SD card slot can be used for storage and media sharing.
- The SIM card and SD card are not provided.

3 Install the provided battery.

4 Replace the cover.

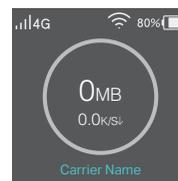

## Connect to the Internet

1 Press and hold the  button until the welcome screen appears.

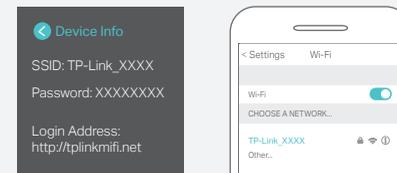

- To power off, press and hold the  button until "Power Off" appears.

2 You will find the following messages on the screen. Follow the instructions to connect to the Mobile Wi-Fi.

Press the **MENU** button twice and then press the  button to select **Device Info**. Use the **SSID** and **Password** shown on the screen to connect to your Mobile Wi-Fi.

Enjoy!

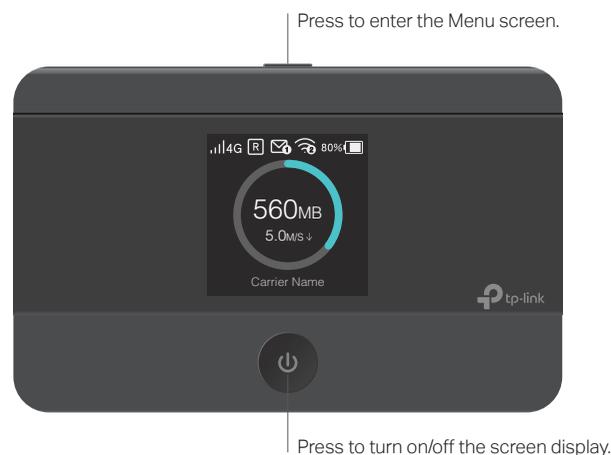

- If other messages display on the screen, please refer to FAQ > Q3.
- By default, Power Saving is enabled and the Mobile Wi-Fi will turn off the Wi-Fi connection if no wireless devices are connected to the Mobile Wi-Fi for 10 minutes. Press the  or **MENU** button to resume the Wi-Fi connection.

# Screen Display

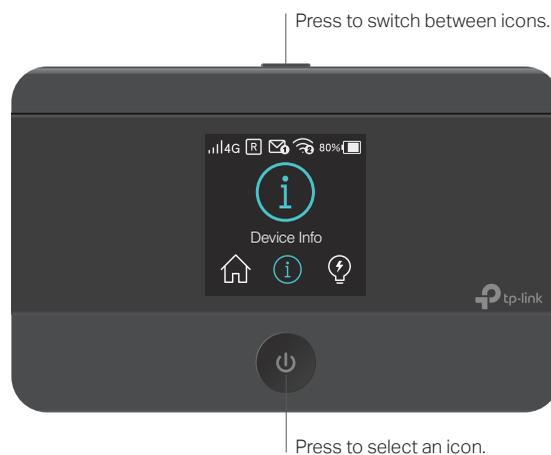

The screen display will automatically turn off after being idle for 15 seconds. Press the or **MENU** button to turn it on again.

# tpMiFi App

Download the tpMiFi app to conveniently manage your Mobile Wi-Fi.

- Modify Wi-Fi settings
- Send and receive SMS
- Manage power
- Share files on the SD card
- Block devices

## How to start?

- Search for the tpMiFi app from Apple App Store or Google Play Store, or scan the QR code.
- Connect your wireless device to the Mobile Wi-Fi.
- Launch tpMiFi and enter **admin** to log in.

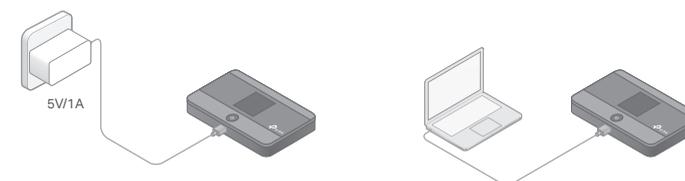

# Charging Your Mobile Wi-Fi

## Method 1

Via a Wall Outlet (Recommended)

## Method 2

Via a Computer

- When the lightning bolt on the battery icon disappears, the Mobile Wi-Fi is fully charged.
- The power adapter is not provided by TP-Link.

# FAQ (Frequently Asked Questions)

## Q1. Is there an alternative way to manage the Mobile Wi-Fi besides the tpMiFi app?

- A. You can manage the Mobile Wi-Fi by using its web management page.
- Connect your wireless device to the Mobile Wi-Fi.
  - Launch a web browser and enter <http://tplinkmifi.net> or <http://192.168.0.1> into the address bar. Enter **admin** for the Password, and then click Login.

## Q2. What should I do if I cannot log in to the web management page?

- Verify that your device is connected to the Mobile Wi-Fi.
- Verify that you have entered <http://tplinkmifi.net> or <http://192.168.0.1> correctly.
- Verify that your device is set to obtain an IP address automatically.

## Q3. What should I do when one of the following messages appears on the screen or I cannot access internet?

- A1. PIN Required
- Log in to the web management page. Enter the PIN according to your mobile carrier, and click **Done**.

## A2. No SIM Card

- Power off the Mobile Wi-Fi and reinstall the SIM card.

## A3. No Service

- Verify that your SIM card is an LTE, WCDMA or GSM SIM card;
  - Verify that your SIM card is in your carrier's service area and has sufficient credit;
  - Verify that your carrier parameters are correct:
- On your phone, log in to the web management page, and go to **Dial-up > View profile details** to verify if APN (Access Point Name), Username and Password are correct. If they are not, return to the **Dial-up** page and create a new profile with the correct information. Then click **Done** and confirm at the prompt.

## A4. icon

- From the Menu screen, go to **Data Roaming** and turn on **Data Roaming**.

## Q4. What should I do if my internet speed is slow?

- A1. If you are experiencing intermittent slow internet, you can switch between 2.4GHz and 5GHz bands for better connectivity. From the Menu screen, go to **Wi-Fi Band** and try a different frequency.
- A2. The 4G network may be temporarily unavailable in your current location. From the Menu screen, go to **Network Mode** and try a different network.

## Q5. How do I restore the Mobile Wi-Fi to its factory default settings?

- A. With the Mobile Wi-Fi powered on, remove the cover, and use a pin to press and hold the **RESET** button until "Power Off" appears on the screen.

Note: Restoring the Mobile Wi-Fi to its factory defaults will clear all previous settings and you will need to reconfigure it.
