Quick Installation Guide

AC1350 Wireless Dual Band Router

Archer C60

Connect the Hardware

If your Internet connection is through an Ethernet cable from the wall instead of through a modem, connect the Ethernet cable directly to the router's Internet port, then follow step 4 and 5 to complete the hardware connection.

Power adapter

Router

4 Turn on the router.

Internet

Power adapter

Modem

1 Turn off the modem, and remove the backup battery if it has one.

2 Connect the modem to the Internet port on your router with an Ethernet cable.

3 Turn on the modem, and then wait about **2 minutes** for it to restart.

5 Verify that the hardware connection is correct by checking these LEDs.

Power	2.4G	5G	Internet
On	On	On	On

Note: If the 2.4G LED 📶 and 5G LED 📶 are off, please press the **WPS/Wi-Fi On/Off** button on the rear panel for 2 seconds, and then check the LEDs again in a few seconds.

Configure the Router

## 1. Connect your computer to the router (Wired or Wireless)

Wired

Turn off the Wi-Fi on your computer and connect the devices as shown below.

Ethernet cable

Wireless

a Find the SSID (network name) and Wireless Password printed on the label at the bottom of the router.

TP-LINK®

Wireless Password /PIN
XXXXXXXX

SSID
2.4G:TP-LINK_XXXX
5G:TP-LINK_XXXX_5G

b Click the network icon of your computer or go to Wi-Fi Setting of your smart device, and then select the SSID to join the network.

Note: If you are not sure of the **Internet Connection Type**, please click **Auto Detect**.

☺ Enjoy the Internet!

Tether App

TP-LINK Tether app provides a simple, intuitive way to access and manage your router.

TP-LINK
Tether

Block unwelcome users from connecting to your network

Change the basic wireless network settings

View information about clients connected to your router

Set up Parental Controls with access time

How to begin?

1. Download the TP-LINK Tether app from the Apple App Store or Google Play.
2. Ensure your smart device is wirelessly connected to the home network.
3. Launch the Tether app and start managing your home network.

More Features

The TP-LINK router is equipped with various features, such as Guest Network, Parental Controls, Access Control, etc.
You can log into the router's Web Management page **http://tplinkwifi.net** to apply these functions. For instructions, please refer to the **User Manual** at **www.tp-link.com**.

FAQ (Frequently Asked Questions)

Q1. What can I do if the login page does not appear?

- If the computer is set to a static or fixed IP address, change the setting to obtain an IP address automatically.
- Verify that **http://tplinkwifi.net** is correctly entered in the web browser. Alternatively, enter **http://192.168.0.1** or **http://192.168.1.1** in the web browser and press **Enter**.
- Use another web browser and try again.
- Reboot your router and try again.
- Disable then re-enable the network adapter being used.

Q2. What can I do if I cannot access the Internet?

- Check if the Internet is working properly by connecting a computer directly to the modem using an Ethernet cable. If it is not, contact your Internet Service Provider.
- Log into the Web Management page of the router, and go to the **Basic > Network Map** page to check whether the Internet IP address is valid or not. If it is, please run the Quick Setup again; otherwise, recheck the hardware connection.
- Reboot your router and try again.
- For cable modem users, log into the Web Management page of the router. Go to **Advanced > Network > Internet > MAC Clone**, click **Use Current Computer MAC Address** and click **Save**, and then reboot both the modem and the router.

Q3. How do I restore the router to its factory default settings?

- With the router powered on, press and hold the **Reset** button on the back until the Power LED starts blinking.
- Log into the Web Management page of the router. Go to **Advanced > System tools > Backup & Restore**, and click **Factory Restore**. The router will restore and reboot automatically.

Q4. What can I do if I forgot my web management password?

- Refer to FAQ > Q3 to reset the router, and then use the default **admin** (all lowercase) for both username and password to log in.

Q5. What can I do if I forgot my wireless network password?

- The factory default Wireless Password/PIN is printed on the label at the bottom of the router.
- Connect a computer directly to the router using an Ethernet cable. Log into the router's Web Management page, and go to **Basic > Wireless** to obtain or reset your wireless password.
