Smartphone requirements:

Android 4.1 or higher
iOS 7.0 or higher

2

Download and install the **tpCamera** app in your smartphone.

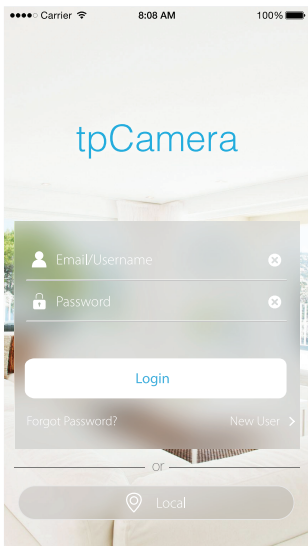

OR

3

Launch tpCamera, log into your TP-LINK Cloud account or create one, then follow the app instructions to set up your new camera.

Relocate the camera to your desired location. You can simply place it on a flat surface, mount it with the provided adhesive or with screws (not included).

①

Unscrew the camera head.

②

Remove the base cover.

③

Use two screws to secure the base.

④

Put the base cover and camera head back on.

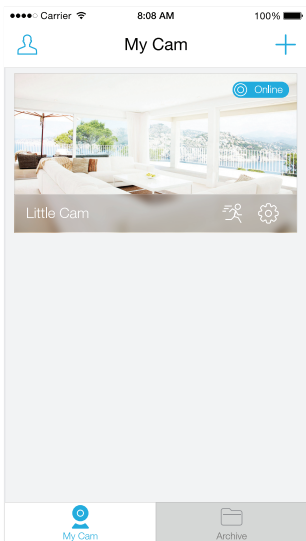

More

about TP-LINK Cloud Camera.

How to view the camera

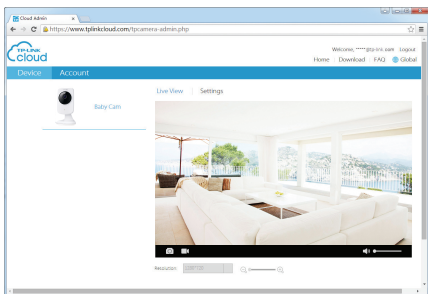

Via Smartphone:

On the **My Cam** screen, tap your camera to view the live video.

Via Computer:

Log into the TP-LINK Cloud website (<https://www.tplinkcloud.com>), and click your camera to view the live video.

How to use the RESET Button

ⓘ Note

Resetting a registered camera will remove it from your TP-LINK Cloud account.

While the camera is powered on, press the **RESET** button for **5** seconds until the System LED on the front panel turns solid red. The camera will reset and reboot.

Get more with the camera

Get notifications when motion is detected

Tap  from **My Cam** screen to set Motion Detection in your tpCamera app.

View all of your cameras on one screen

Download and install the TP-LINK Camera Control utility to view and manage multiple cameras on one screen. For details, see the Camera Control User Guide.
