

Quick Installation Guide

300Mbps Wireless N Router

TL-WR840N

7106506144 REV2.0.2

Connect the Hardware

If your Internet connection is through an Ethernet cable from the wall instead of through a DSL / Cable / Satellite modem, connect the Ethernet cable directly to the router's WAN port, then follow steps 4 and 5 to complete the hardware connection.

Configure the Router

1. Connect your computer to the router (Wired or Wireless)

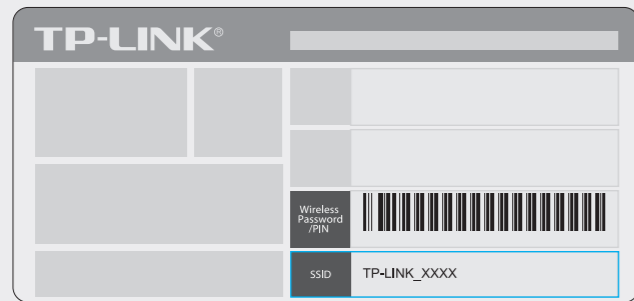

Wired

Turn off Wi-Fi on your computer and connect the devices as shown below.

Wireless

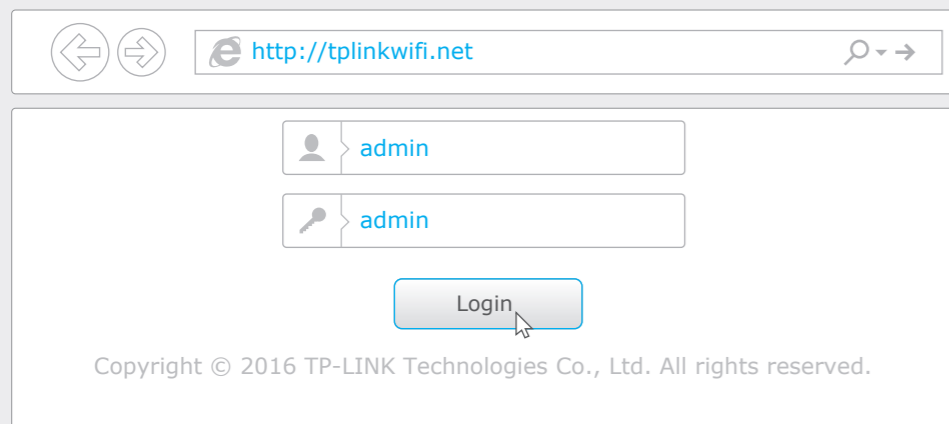

Connect wirelessly by using the SSID (Network Name) and Wireless Password/PIN printed on the product label at the bottom of the router.

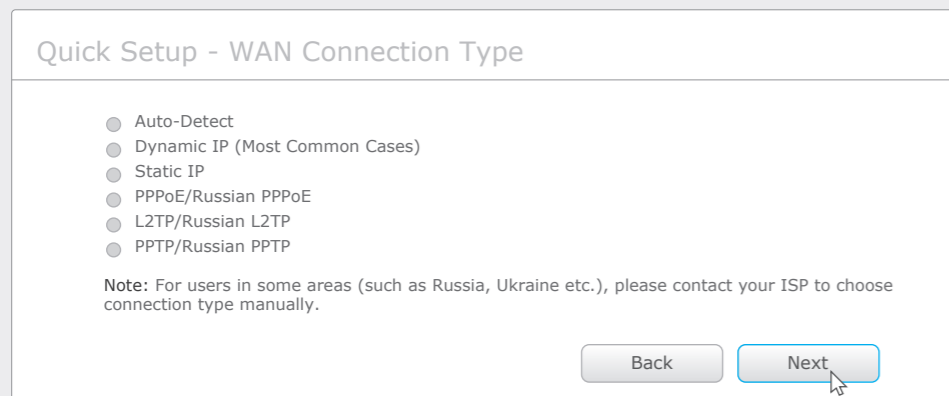

2. Configure the router using a web browser

A Enter <http://tplinkwifi.net> or <http://192.168.0.1> in the address bar of the web browser. Enter **admin** for both username and password, and then click **Login**.

Note: If the login window does not appear, please refer to FAQ > Q1.

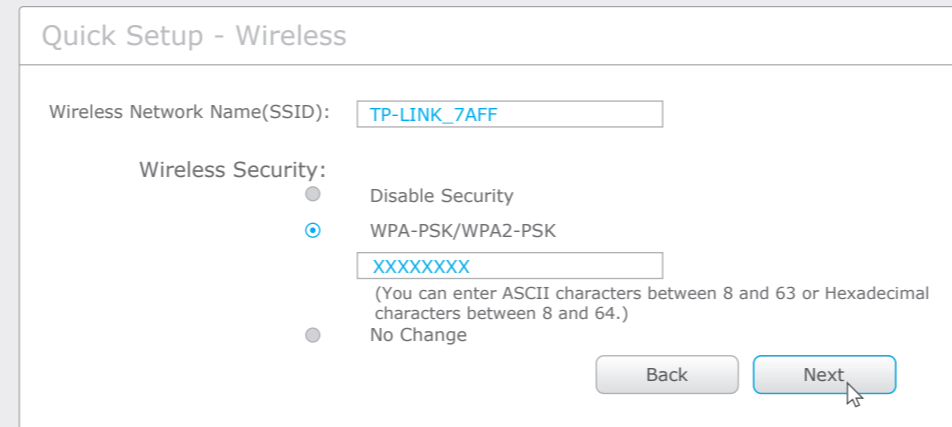

B Click **Quick Setup** on the left menu, and click **Next**. Select your **WAN Connection Type**. If you are unsure of your connection type, select **Auto-Detect**. Click **Next** and follow the onscreen instructions.

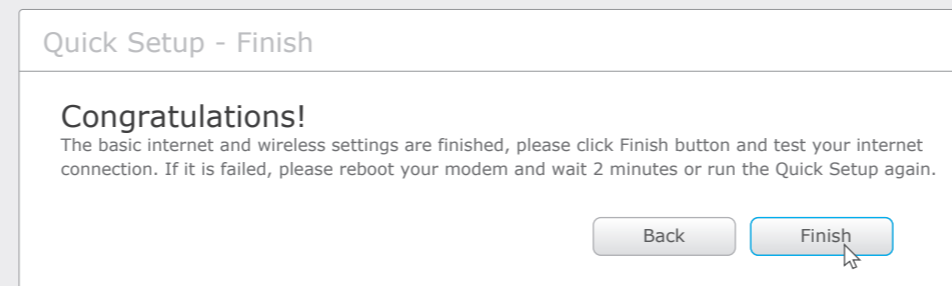

C Either use the default or customize your wireless settings, and click **Next**.

Note: If you change the default SSID and password, write down the new wireless settings.

D Click **Finish** to complete the Quick Setup.

Configure via Tether App

TP-LINK's Tether app lets you conveniently access the router and:

- View information about the clients on your network.
- Block network access from specific users or devices.
- Set up Parental Control with access time and content restrictions.
- Change the basic wireless network settings easily.

How to start?

- 1 Scan the QR code to download the TP-LINK Tether app from the Apple App Store or Google Play.
- 2 Ensure your smart device is wirelessly connected to the home network.
- 3 Launch the Tether app and start managing your home network.

FAQ (Frequently Asked Questions)

Q1. What can I do if the login window does not appear?

- If the computer is set to a static or fixed IP address, change the settings to obtain an IP address automatically.
- Verify if <http://tplinkwifi.net> or <http://192.168.0.1> is correctly entered in the web browser. Alternatively, enter <http://192.168.1.1> in the web browser and press **Enter**.
- Use another web browser and try again.
- Reboot your router and try again.
- Disable the network adapter used currently and then enable it again.

Q2. What can I do if I cannot access the Internet?

- Check if the Internet is working properly by connecting a computer directly to the modem via Ethernet cable. If not, contact your Internet Service Provider.
- Open a web browser, enter <http://tplinkwifi.net> or <http://192.168.0.1> and run the setup again.
- Reboot your router and try again.

Note: For cable modem users, reboot the modem first. If the problem still exists, log in to the Web Management page of the router, and go to **Network > MAC Clone**, click **Clone MAC Address** and then click **Save**.

Q3. How do I restore the router to its factory default settings?

- While the router is powered on, press and hold the **WPS/RESET** button on the rear panel of the router for approximately 8 seconds.
- Log in to the Web Management page of the router, and go to **System tools > Factory Defaults**, click **Restore**, and then wait until the progress bar is finished.

Q4. What can I do if I forget my web management page password?

- Refer to FAQ > Q3 to reset the router, and then use the default **admin** (all lowercase) for both username and password to log in.

Q5. What can I do if I forget my wireless network password?

- If you have not changed the default Wireless Password, it can be found on the product label of the router.
- If you have changed your password, log in to the router's Web Management page, go to **Wireless > Wireless Security** to obtain or reset your password.
