

Quick Installation Guide

450Mbps Wireless N Router

TL-WR940N / TL-WR941ND

1. Connect the Hardware

- 1 **Power off** the modem, and remove the backup battery if any.
- 2 Connect the modem to the Internet port on your router using an Ethernet cable.
- 3 **Power on** the modem, wait for 2 minutes and then **power on** the router.
- 4 Check the following LEDs to ensure the hardware connection is correct.

Note: If your Internet comes via an Ethernet cable from the wall instead of any DSL/Cable/Satellite modems, please connect the Ethernet cable directly to the router's WAN port.

2. Configure the Router

- 1 Connect your computer to the router (Wired or Wireless).

• Wired

• Wireless

Connect wirelessly by using the default network name (SSID) and password printed on the product label at the bottom of the router.

Or
- 2 Open a web browser on the computer and configure the router according to the following main clues.

a Enter **http://tplinkwifi.net** in the address bar.

Type in **admin** for both the user name and password and click **Login**.

Note: If the login window does not appear, please refer to FAQ->Q1.

b Click **Next** to continue the Quick Setup.

c Select your WAN Connection Type, or click **Auto-Detect** if you are unsure what your connection type is. Click **Next** and follow the instructions to continue.

d Verify or change the wireless network settings, and click **Next**.

Note: You may customize your wireless network name and password. If you do so, please note down the new ones.

e Click **Finish** to complete the setup.

Frequently Asked Questions (FAQ)

Q1. What can I do if the login window does not appear?

- A1. If the computer is set to a static or fixed IP address, change it to obtain an IP address automatically.
- A2. Verify that 'http://tplinkwifi.net' is correctly entered in the web browser. Alternatively, enter 'http://192.168.0.1' in the web browser and press 'Enter'.
- A3. Use another web browser and try again.
- A4. Reboot your router and try again.
- A5. Disable the network adapter used currently and then enable it again.

Q2. What can I do if I cannot access the Internet?

- A1. Check if the Internet is working properly by connecting a computer directly to the modem via Ethernet cable. If not, contact your Internet Service Provider.
- A2. Open a web browser, enter 'http://tplinkwifi.net' and try to set up again.
- A3. Reboot your router and try again.

Note: For cable modem users, reboot the modem first. If the problem still exists, go to **Network>MAC Clone**, then click Clone MAC Address and Save.

MAC Clone

Your PC's MAC Address:

Q3. How do I restore the router to its factory default settings?

- A1. While the router is powered on, press and hold the 'WPS/Reset' button on the rear panel of the router for approximately 8 seconds.
- A2. Log in Web Management page of the router, and go to **System tools->Factory Defaults**, click **Restore**, then wait until the progress bar loading finished.

Q4. What can I do if I forget my web management page password?

- A. Restore the router to its factory default settings and then use the default User Name 'admin' and Password 'admin' to log in.

Q5. What can I do if I forget my wireless network password?

- A1. The factory default password can be found on the product label printed on the bottom of the router.
- A2. If you have changed your password, log in to the router's Web Management page, go to **Wireless>Wireless Security** to obtain or reset your password.
