Configuring the Camera

Via Smartphone:

1 Connecting the camera

Connect the camera to the network your smartphone is on.

System LED

-  **Flashing red:** System starting
-  **Solid red:** Network disconnected
-  **Solid green:** Network connected

Smartphone requirements:

Android 2.3 or higher

iOS 6.0 or higher

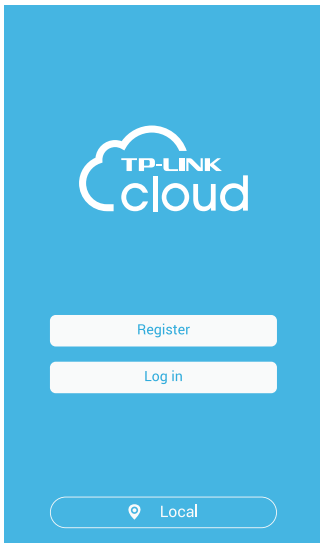

2 Registering the camera

1. Download and install the tpCamera app from an app store or by scanning the QR code below.

2. Open the app, tap **Register**, and follow the instructions in the app to set up your camera.

Tips: Tap **Local** to view your camera locally only.

3. Sign up for a TP-LINK Cloud account and tap **Add to Cloud account**.

The screenshot shows a mobile application screen titled "Add to Cloud account". At the top left is a back arrow icon. Below the title, there is a text prompt: "Sign up for a TP-LINK Cloud account and add your camera to it." This is followed by four input fields: "Username", "E-mail", "Password", and "Confirm password". Below the fields is a checkbox that is checked, with the text "I accept the TP-LINK Cloud [Privacy Policy](#) and [Terms of Use](#)". At the bottom of the form is a large orange button labeled "Add to Cloud account".

4. You have finished setting up the camera and registering it when you reach the **Device** page.

Tips: Tap  to switch to the local view; tap  to add more cameras.

3 Viewing the camera

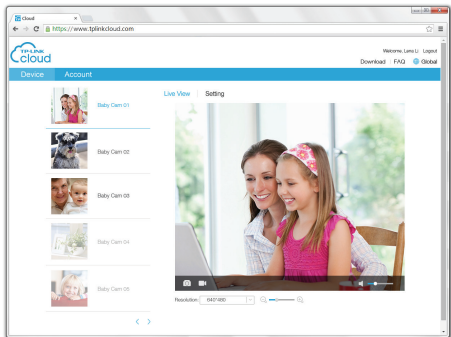

Via Smartphone:

On the **Device** page, tap your camera to view the live video.

Via Computer:

Log in to the TP-LINK Cloud website (<https://www.tplinkcloud.com>) and click your camera to view the live video.

Configuring the Camera

Via Computer:

1 Connecting the camera

Connect the camera to the network your computer is on.

System LED

-  **Flashing red:** System starting
-  **Solid red:** Network disconnected
-  **Solid green:** Network connected

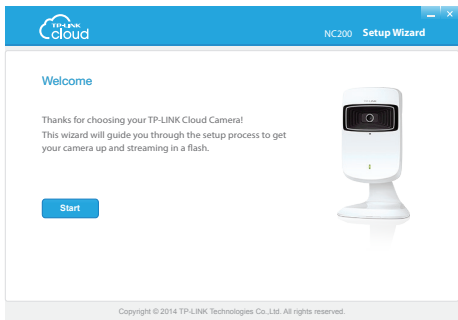

Computer requirements:

Windows XP/Vista/7/8

Mac OS X 10.7 or higher

2 Registering the camera

1. Download the setup wizard specific to your camera model and operating system from <https://www.tplinkcloud.com/download.php>
2. Run the setup wizard, click **Start**, and follow the system instructions to set up your camera.

3. Sign up for a TP-LINK Cloud account and click **Next**.

TP-LINK cloud

NC200 Setup Wizard

Add a camera to a TP-LINK Cloud account

Adding a camera to your TP-LINK Cloud account will allow you to access your camera through the Internet.

4. Click **Finish** to complete the registration when the **Complete** page is displayed.

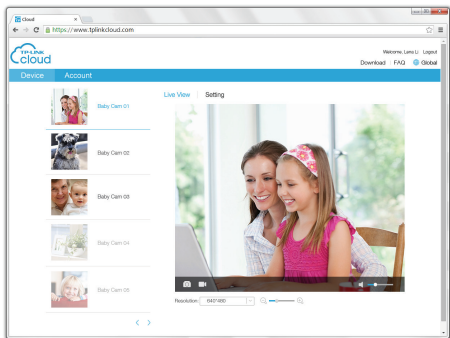

The screenshot shows a web browser window titled "TP-LINK cloud" with "NC200 Setup Wizard" in the top right corner. The main content area has a blue heading "Complete!". Below it, a message states: "Your camera is now ready to use! You can now view your camera's feed online at [TP-LINK Cloud](#)." The account information is listed as "Account: example@gmail.com" and "Camera Name: NC200" with a blue checkmark icon to its right. A checkbox is checked and labeled "Add an Internet shortcut for TP-LINK Cloud to my desktop." To the right of the text is a photograph of a woman and a young girl smiling and looking at a laptop. At the bottom right of the content area is a blue button labeled "Finish". The footer of the page contains the text "Copyright © 2014 TP-LINK Technologies Co.,Ltd. All rights reserved."

3 Viewing the camera

Via Computer:

Log in to the TP-LINK Cloud website (<https://www.tplinkcloud.com>) and select your camera from the list to view the live video.

Via Smartphone:

Download and install the tpCamera app from an app store or by scanning the app QR code in this guide, log in, and tap your camera to view the live video.

Appendix 1

How to Mount the Camera

ⓘ Note

If you use the camera wirelessly, mount the camera within the coverage of your wireless network.

①

Unscrew the camera head.

②

Remove the base cover.

③

Drill two mounting holes and fix the mounting base.

④

Put the base cover and camera head back.

Appendix 2

How to Reset the Camera

ⓘ Note

Resetting a registered camera will remove it from the TP-LINK Cloud account.

While the camera is powered on, press and hold the **WPS/RESET** button for at least 5 seconds. The System LED will go off and the camera will reboot.
