About This Guide

This guide is a complement to Quick Installation Guide. The Quick Installation Guide provides instructions for quick internet setup, while this guide contains details of each function and demonstrates how to configure them.

When using this guide, please notice that features of the extender may vary slightly depending on the model and software version you have, and on your location, language, and internet service provider. All screenshots, images, parameters and descriptions documented in this guide are used for demonstration only.

Conventions

In this guide the following conventions are used:

More Info

The latest software, management app and utility are available from the Download Center at [www.tp-link.com/support](http://www.tp-link.com/support).

The Quick Installation Guide can be found where you find this guide or inside the package of the range extender.

Specifications can be found on the product page at [http://www.tp-link.com](http://www.tp-link.com).

A Technical Support Forum is provided for you to discuss our products at [http://forum.tp-link.com](http://forum.tp-link.com).

Our Technical Support contact information can be found at Contact Technical Support page at [www.tp-link.com/support](http://www.tp-link.com/support).
Chapter 1

Get to Know About Your Extender

This chapter introduces what the extender can do and its appearance. It contains the following sections:

- Product Overview
- Appearance
1. 1. Product Overview

Bring Dead Zones Back to Life
Tired of Wi-Fi “dead zones”? The TP-Link extender is connected to your router wirelessly, strengthening its signal and expanding its coverage into areas that could not otherwise be reached. The device also reduces signal interference to ensure reliable Wi-Fi coverage throughout your home or office.

Easy Installation & Quick Position
The extender works with any standard wireless router. Instantly connect the extender to a router by pressing the router’s WPS button (if available) followed by the extender’s RE/WPS button. Alternatively, follow the Quick Setup instructions on the extender’s web management page.

Once the extender is connected to a router, you can relocate it to your preferred location with no further configuration required. The intelligent signal light can help to find the best location.

Easy Management with the TP-Link Tether App
Tether provides a simple, intuitive way to access and manage your extender with your smart devices.

1. 2. Appearance

Note: RE365 (UK version) is used for demonstration in this guide. Images may differ from actual products.
1.2.1. LED Explanation

You can check the extender's working status by following the LED Explanation table.

<table>
<thead>
<tr>
<th>Name</th>
<th>Status</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>WPS</strong> (Signal)</td>
<td>Solid blue</td>
<td>The extender is connected to your router's wireless network and is in a suitable location.</td>
</tr>
<tr>
<td></td>
<td>Solid red</td>
<td>The extender is experiencing poor signal strength. Try relocating it closer to your router.</td>
</tr>
<tr>
<td></td>
<td>Flashing blue</td>
<td>WPS connection is in progress.</td>
</tr>
<tr>
<td></td>
<td>Off</td>
<td>No wireless connection is established.</td>
</tr>
<tr>
<td><strong>2.4GHz/5GHz</strong></td>
<td>On</td>
<td>The extender is connected to the 2.4GHz/5GHz wireless network of your host router.</td>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WPS Button</td>
<td>Press the WPS button on your host router, and immediately press the WPS button on the extender. The Signal LED of the extender should change to solid blue, indicating successful WPS connection.</td>
</tr>
<tr>
<td>Power Button</td>
<td>Press the Power button to turn on or off the extender.</td>
</tr>
<tr>
<td>LED Button</td>
<td>Press the LED button to turn on or off all the LEDs.</td>
</tr>
<tr>
<td>Reset (Hole)</td>
<td>Use a pin to press and hold the Reset button until all the LEDs turn on momentarily to reset the extender.</td>
</tr>
<tr>
<td>Ethernet Port</td>
<td>Connect your Ethernet-only device to the Ethernet port of the extender to join the Wi-Fi network.</td>
</tr>
</tbody>
</table>
Chapter 2

Set Up Internet Connection

This chapter informs you how to boost your host wireless coverage. Please follow the step-by-step instructions to set up the internet connection.

It contains the following sections:

- Quick Setup
- Position Your Extender
2. 1. **Quick Setup**

**Power on**

Plug the extender into an electrical outlet next to your host router, and then wait until the Power LED is solid on.

*Note: For safety, we suggest that you plug the extender in upright directions as shown below.*

![Power LED](image)

**Connect to the host network**

There are three ways to connect to the host network: via a web browser, via the Tether app, and via the WPS button.

### 2. 1. 1. Method 1: Via a Web Browser

1. Connect your computer to the extender's wireless network.

*Tips:*
Before connecting, please find the SSID (network name) on the label of the extender.

- For Windows Users
  1) Unplug the Ethernet cable from your computer (if any).
  2) Click the Wi-Fi icon on the taskbar and connect to the extender's wireless network: TP-Link_Extender_2.4GHz or TP-Link_Extender_5GHz.
• For Mac OS X Users
  1) Unplug the Ethernet cable from your computer (if any).
  2) Click the Wi-Fi icon in the top right corner of the screen, and connect to the extender’s network: *TP-Link_Extender_2.4GHz* or *TP-Link_Extender_5GHz*.

2. Follow the instructions of Quick Setup Wizard to connect the extender to your host router.
  1) Launch a web browser, enter [http://tplinkrepeater.net](http://tplinkrepeater.net) or [http://192.168.0.254](http://192.168.0.254) in the address field, and then create a password for future login attempts, and click **Start**.

  Tips: If the login window does not appear, please refer to FAQ.

  2) Select your host router’s 2.4GHz SSID (network name), enter its password (NOT the password you just created for management), and click **Next**.
3) Select your host router’s 5GHz SSID (network name), enter its password (NOT the password you just created for management), and click Next.

Tips: If your host router does not support 5GHz wireless network, please click Skip to continue.

4) Either keep the default SSIDs (network names) or customize them for the extended networks, and then click Next.
5) Verify your wireless settings and click Next. The corresponding LED(s) (2.4GHz or 5GHz) should turn on.

6) To enjoy a more complete service from TP-Link (remote management, TP-Link DDNS, etc.), log in with your TP-Link ID or click Register Now to get one. Then follow the instructions to bind the extender to your TP-Link ID.

Note:
- To learn more about the TP-Link Cloud service, please refer to the TP-Link Cloud Service section.
- If you do not want to register a TP-Link ID for now, you may click Log In Later to proceed.

7) Enjoy! Connect to the extended network and enjoy the internet. Both extended networks share the same wireless passwords as those of your host networks,
but may have different network names if you have customized the SSIDs during
the configuration.

Tips: Since the performance of the extended network will be affected by the distance between
extender and host router, we highly recommend you to relocate your extender referring to Position Your
Extender.

2.1.2. Method 2: Via the TP-Link Tether App

1. Launch the Apple App Store or Google Play Store and search TP-Link Tether or simply
scan the QR code to download and install the app.

OR

2. Go to Wi-Fi Settings and connect your device to the extender’s wireless network:
TP-Link_Extender_2.4GHz or TP-Link_Extender_5GHz.

3. Launch Tether and select your extender from the Local Device list.

4. Create a password for future logins and click Create.
5. Follow the on-screen instructions to complete the configuration.
   - Tips: You can manage your extender via Tether, such as controlling LEDs, sharing passwords of your networks and blocking devices.

2. 1. 3. Method 3: Via the WPS Button

1. Press the WPS button on your host router. The button might look like one of these: 🌐 | 📡 | 🔓. Then press the WPS button on the extender within 2 minutes.

   - Tips:
     - Some ISP gateways disable the WPS function by default. If the WPS connection fails, please refer to Method 1: Via a Web Browser or Method 2: Via the TP-Link Tether App.
     - For more information about using WPS button on your host router, please refer to the router manufacturer’s user guide.

2. Wait until the Signal LED changes to solid blue, which indicates that the WPS connection is successful. If it doesn’t, please refer to other methods.

3. If you are connecting the extender to a dual-band router but only the 2.4GHz or 5GHz LED is on, repeat Step 1 and 2 to connect to the other band.

4. Enjoy! Connect to the extended network and enjoy the internet. Both extended networks share the same SSIDs (network names) and passwords as those of your host networks.
Tips: Since the performance of the extended networks will be affected by the distance between extender and host router, we recommend that you relocate your extender by referring to Position Your Extender.

2.2. Position Your Extender

Please follow the instructions below to achieve optimal performance of the extender.

1. Plug the extender into an electrical outlet between your host router and the Wi-Fi "dead" zone. The location you choose must be within the range of your existing host network.

2. Wait until the Signal LED is lit and solid blue. If not, relocate it closer to the host router to achieve better signal quality.

Tips: To minimize signal interference, please choose a location which is far away from Bluetooth devices and other household electronic devices, such as cordless phones, microwave ovens and baby monitors.
Chapter 3

Customize Your Network

This chapter guides you on how to configure network settings that are available for this extender.

It contains the following sections:

• Check Internet Status
• Configure Wireless Network
• Change LAN Settings
• Specify DHCP Server Settings
• Adjust Wi-Fi Coverage
• Set Access Control
3. 1. Check Internet Status

You can view the internet status of your extender to check whether you have successfully set up the extended network(s).

1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to Settings > Status to view the internet status of your extender.
   - The extender is functioning normally.

   ![Image 1]

   - The extender is not connected to the host networks. Please go to Settings > Wireless > Connect to Network to check the passwords of the host networks. If the problem still exists, please refer to the FAQ section.

   ![Image 2]

   - The extender is connected to the host network, but is not transmitting data. Please check your router’s internet connection.

   ![Image 3]

   - The extender is connected to the router abnormally. Please go to Settings > Network and try setting your extender to obtain an IP address automatically.

   ![Image 4]

Click the Internet/Router/Range Extender/Clients icon to view corresponding information.

3. 2. Configure Wireless Network

If you want to extend another host network after Quick Setup, you can refer to this section. Moreover, you can change the wireless settings for your extended networks.
Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.

**Note:** Here we take the configuration of the 2.4GHz network as an example. If the 5GHz network is available on your extender, please refer to the instructions to set your 5GHz network.

- **To extend another host network:**
  1. Go to **Settings > Wireless > Connect to Network**.
  2. Enable **Connect to 2.4GHz Network** and click **Wireless Scanner** to find all available networks.

```
Connect to Host Network

2.4GHz Network:
- Connect to 2.4GHz Network
- Wireless Scanner
- Host 2.4GHz SSID:
- Host 2.4GHz Security: No Security
- Host 2.4GHz Password:

5GHz Network:
- Connect to 5GHz Network
- Wireless Scanner
- Host 5GHz SSID:
- Host 5GHz Security: No Security
- Host 5GHz Password:
```

3. Select the 2.4GHz host network you want to extend.

**Note:**
If the network you want to extend is on but not listed, please try the following steps.
1. Move the extender closer to your router, and click **Rescan** in the top-right corner of the list.
2. You can manually enter the SSID (network name) and password of the network you want to extend, and click **Save**.

4. Once a host network is selected, the SSID and security type will be automatically filled in. If the selected network is encrypted, enter the password in the **Password** field.

5. Click **Save**.

- **To enable or disable the extended network:**
  1. Go to **Settings > Wireless > Extended Network**.
  2. Extended networks are enabled by default. If you want to disable the wireless function of a certain band, just clear the **Enable** checkbox. In this case, all the wireless settings of this band will be invalid.
3. Click **Save**.

- **To change the wireless network name (SSID):**
  1. Go to **Settings > Wireless > Extended Network**.
  2. Create a new SSID in **Extended 2.4GHz SSID** or click **Copy Host SSID**. The value is case-sensitive.
  3. Click **Save**.

  - **Note:** If you have changed the wireless settings via a wireless device, you will be disconnected after the settings are applied. Please write down the new SSID for future use.

- **To hide the SSID of the extended network:**
  1. Go to **Settings > Wireless > Extended Network**.
  2. Select **Hide SSID broadcast**, and the corresponding SSID will not be displayed when wireless devices scan for local wireless networks. Devices must join the network manually in order to connect.
  3. Click **Save**.

### 3.3. Change LAN Settings

The extender is preset with a default LAN IP 192.168.0.254, with which you can log in to the web management page. The LAN IP address, together with the Subnet Mask, also defines the subnet that the connected devices are on. If the IP address conflicts with another device on your local network or your network requires a specific IP subnet, you can change it.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to **Settings > Network**.
3. Select **Use the following IP address**.
4. Enter a new IP address as needed and leave the **Subnet Mask** as the default settings and enter the gateway that is in the same subnet as the IP address. The gateway is usually the LAN IP address of your extender.
5. Click Save.

3.4. **Specify DHCP Server Settings**

By default, the DHCP (Dynamic Host Configuration Protocol) Server is enabled and the extender acts as a DHCP server; it dynamically assigns TCP/IP parameters to client devices from the IP Address Pool. You can change the settings of the DHCP Server if necessary.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to Settings > Network.

   ➢ To specify the IP address that the extender assigns:

   ![DHCP Server Settings](image)

1. Select Auto (recommended) or On to enable the DHCP Server.
2. Enter the starting and ending IP addresses in the IP Address Pool.
3. Enter other parameters if the ISP requires them. The Default Gateway is automatically filled in and is the same as the LAN IP address of the extender.
4. Click Save.
➢ **To view the DHCP Client List:**
You can view the information of the DHCP clients connected to the extender in the DHCP Client List.

![DHCP Client List](image)

3.5. **Adjust Wi-Fi Coverage**
You can set the extender’s Wi-Fi coverage depending on how large you want your Wi-Fi area to be.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net) and log in with the password you set for the extender.
2. Go to **Settings > Advanced Settings > Wi-Fi Coverage**.
3. Select **Min**, **Mid** or **Max** to adjust your Wi-Fi coverage of the extender.

![Wi-Fi Coverage](image)

4. Click **Save**.

3.6. **Set Access Control**
Access Control allows you to permit or block specific devices from accessing the internet for a specific period.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net) and log in with the password you set for the extender.
2. Go to **Settings > Advanced Settings > Access Control**.
3. Enable **Access Control**.

![Access Control](image)

- **To block specific device(s):**
  
  **Note:** Devices connected to the extender via an Ethernet cable cannot be blocked.

1. Select **Blacklist** and click **Save**.

![Access Mode](image)

2. Select the device to be blocked in the **Online Devices** table by ticking the corresponding checkbox.
3. Click **Block** and the selected device(s) will be added to the **Devices in Blacklist** table.

![Online Devices](image)

4. Click in the **Devices in Blacklist** table to set the **Effective Time** for a certain entry as needed.

![Device Effective Time](image)
5. Click **OK**.

- **To permit specific device(s):**
  1. Select **Whitelist** and click **Save**.

![Access Mode](image)

2. Click **Add** in the **Devices in Whitelist** table. Enter the **Device Name** and **MAC Address**. And you can set the **Effective Time** for a certain entry as needed.

![Device Configuration](image)

3. Click **OK**.
Chapter 4

More Features of Your Extender

This chapter explains how to use the extender as a wireless adapter and as an access point.

It contains the following sections:

• Use Your Extender as a Wireless Adapter
• Transform Your Existing Wired Network to a Wireless One
4. 1.  **Use Your Extender as a Wireless Adapter**

The extender can be used as a wireless adapter to connect any wired-only device, such as a Blu-ray player, game console, DVR, or smart TV, to your wireless network. After configuration, you can connect an Ethernet-enabled device to the extender via an Ethernet cable.

**Note:** Extenders that have no Ethernet port do not support this feature.

![Diagram of devices connected via Ethernet](image)

By default, the Ethernet port of the extender is connected to the 5GHz wireless network.

- To change the connected wireless frequency:
  1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
  2. Go to **Settings > Network**.
  3. Select **2.4GHz** or **5GHz** and click **Save**.

4. 2. **Transform Your Existing Wired Network to a Wireless One**

The extender can work as an access point, transforming your existing wired network to a wireless one.

4. 2. 1. **To Set Up the Extender as an Access Point**

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Click **Mode** in the top right corner of the page. Select **Access Point** and click **Save**.

   The extender will reboot and switch to Access Point mode.
3. After rebooting, connect the extender to your modem or wired router via an Ethernet cable.

4. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.

5. Go to Quick Setup to configure your extender.
   
   1) Configure your wireless settings and click Next.

   2) Confirm the information and click Finish. Now, you can enjoy Wi-Fi.
4. 2. 2. To Connect Your Wireless Devices to the Extender via WPS

Wi-Fi Protected Setup (WPS) provides an easier way to set up a secure Wi-Fi connection. Wireless devices that support WPS, including Android phones, tablets and most USB network cards, can be connected to your extender through this method (not supported by iOS devices).

1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to Settings > Wireless > WPS.
3. Enable WPS.

4. Connect via WPS:
   - AP’s PIN: Enable AP’s PIN and enter the PIN on your device. You can click Generate to get a new PIN or click Default to restore the PIN to its factory one.
   - Push Button (Recommended): Click Connect and push the WPS button on the client device.
• PIN code: Enter the client’s PIN, and click Connect.
Chapter 5

TP-Link Cloud Service

TP-Link Cloud service provides a better way to manage your cloud devices. Log in to your extender with a TP-Link ID, and you can easily monitor and manage your home network when you are out and about via the Tether app on your smartphone or tablet. To ensure that your extender stays new and gets better over time, the TP-Link Cloud will notify you when an important firmware upgrade is available. Surely you can also manage multiple TP-Link Cloud devices with a single TP-Link ID.

This chapter introduces how to register a new TP-Link ID, bind or unbind TP-Link IDs to manage your extender, and the Tether app with which you can manage your home network no matter where you may find yourself.

It contains the following sections:

- [Register a TP-Link ID](#)
- [Change Your TP-Link ID Information](#)
- [Manage the User TP-Link IDs](#)
- [Manage the Extender via TP-Link Tether App](#)
5.1. Register a TP-Link ID

If you have skipped the registration during the Quick Setup process, you can:
1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to Settings > TP-Link Cloud.
3. Click Register Now and follow the instructions to register a TP-Link ID.

4. After activating your TP-Link ID, come back to the TP-Link Cloud page to log in. The first-time login TP-Link ID will be bound automatically to your cloud extender as an Admin.

Note:
- To learn more about the Admin and User TP-Link ID, refer to Manage the User TP-Link IDs.
- Once the extender is bound to your TP-Link ID, you need to log in to the extender with the TP-Link ID.
- You can register another TP-Link ID via the Tether APP. Please refer to Manage the Extender via TP-Link Tether App to install the app and register a new one.
- If you want to unbind the Admin TP-Link ID from your extender, please go to Settings > TP-Link Cloud, click Unbind in the Device Information section.

5.2. Change Your TP-Link ID Information

Follow the steps below to change your email address and password of your TP-Link ID as needed.
1. Visit http://tplinkrepeater.net, and log in with your TP-Link ID.
2. Go to Settings > TP-Link Cloud, and focus on the Account Information section.

- Change your email address
  1. Click behind the Email.
  2. Enter the password of your TP-Link ID, then the new email address. And click Save.
5.3. Manage the User TP-Link IDs

The first-time login TP-Link ID will be bound automatically to your extender as an Admin account. An Admin account can add or remove other TP-Link IDs to the same extender as Users. Admin account and User accounts both can monitor and manage the extender locally or remotely, except that user accounts cannot:

- Reset the extender to its factory default settings from the web management page or the Tether app.
• Add/remove other TP-Link IDs to/from the extender.

5. 3. 1.  Add an TP-Link ID to Manage the Extender

1. Visit http://tplinkrepeater.net, and log in with your TP-Link ID.

2. Go to Settings > TP-Link Cloud, and focus on the Bound Accounts section.

3. Click + Bind, enter another TP-Link ID as needed and click Save.

**Note:**
If you need another TP-Link ID, please refer to Manage the Extender via TP-Link Tether App to install the app and register a new one.

4. The new TP-Link ID will be displayed in the Bound Accounts table as a User.

5. 3. 2.  Remove TP-Link ID(s) From Managing the Extender

1. Visit http://tplinkrepeater.net, and log in with your TP-Link ID.

2. Go to Settings > TP-Link Cloud, and focus on the Bound Accounts section.

3. Check the box(es) of the TP-Link ID(s) you want to remove and click Unbind.
5.4. Manage the Extender via TP-Link Tether App

The Tether app runs on iOS and Android devices like smartphones and tablets.

1. Open the Apple App Store or Google Play and search the key word **TP-Link Tether** or simply scan the QR code to download and install the app.

2. Connect your device to the extender’s wireless network.

3. Launch the Tether app, select the model of your extender and log in with your TP-Link ID or the password you set for the extender.

4. Manage your extender as needed.
Chapter 6

Manage Your Extender

This chapter presents how to manage and maintain your extender. It contains the following sections:

• Set Up System Time
• Control LEDs
• Power Schedule
• Upgrade the Firmware
• Backup and Restore Configuration Settings
• Change Login Password
• System Log
6. 1. **Set Up System Time**

The System Time of the extender will be used for time-based functions such as the Power Schedule function. If you have enabled the Daylight Saving Time feature, the system time will be synchronized with the daylight saving time you configure.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to **Settings > System Tools > Time Settings**.

- **To get system time:**
  1. Select your local **Time Zone** from the drop-down list.

2. Click **Save**.

- **To set up Daylight Saving Time:**
  1. Select **Enable Daylight Saving Time**.

2. Select the **Start** and **End** date and time of the daylight saving time at your local time zone.
3. Click **Save**.

6. 2. **Control LEDs**

The LEDs of the extender indicate its activities and status. You can enable the Night Mode feature to specify a time period during which the LEDs are off.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to Settings > System Tools > LED Control.

➢ To specify a time period when LEDs are off:
1. Select Night Mode.
2. Specify a time period in the LED Off Time field, and the LEDs will be off during this period.
3. Click Save.

![LED Control](image)

6.3. Power Schedule

The Power Schedule feature allows you to specify a time period during which the extender is off.
1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to Settings > Advanced Settings > Power Schedule.

➢ To specify a time period when the extender is off:
1. Select Enable Power Schedule.
2. Specify a time period in the Power-Off Time field and days in the Day(s) field, and the extender will be off during this period.

![Power Schedule](image)
3. Click **Save**.

### 6.4. Upgrade the Firmware

TP-Link is committed to improving product features, giving you a better network experience. You can upgrade the firmware online or download the latest firmware file from the Support page at our website www.tp-link.com and upgrade the extender to the latest firmware version.

- **Note:**
  1. Make sure the latest firmware file is matched with the hardware version (as shown in the download section of the Support page).
  2. Make sure that you have a stable connection between the extender and your computer. It is NOT recommended to upgrade the firmware wirelessly.
  3. Backup your extender configuration.
  4. Do NOT power off the extender during the firmware upgrade.

➤ **To upgrade the firmware online:**

1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to **Settings > System Tools > Firmware Upgrade**, and click **Check for upgrade** to see whether a new firmware is released.

![Online Upgrade](image)

3. Focus on the **Online Upgrade** section, and click **Upgrade**.

![Online Upgrade](image)

4. Wait a few minutes for the firmware upgrade to complete and the extender to reboot.

➤ **To upgrade the firmware locally:**

1. Download the latest firmware file for the extender from our website www.tp-link.com.
2. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
3. Go to **Settings > System Tools > Firmware Upgrade**.
4. Click **Browse** to locate the downloaded new firmware file, and then click **Upgrade**.
5. Wait a few minutes for the firmware upgrade to complete and the extender to reboot.

6.5. Backup and Restore Configuration Settings

The configuration settings are stored as a configuration file in the extender. You can backup the configuration file and restore the extender to the previous settings from the backup file when needed. Moreover, if necessary, you can erase the current settings and reset the extender to the default factory settings.

1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to Settings > System Tools > Backup & Restore.

➢ To backup configuration settings:
Click Backup to save a copy of the current settings to your local computer. A ‘.bin’ file of the current settings will be stored on your computer.

➢ To restore configuration settings:
1. Click Browse to locate the backup configuration file stored on your computer, and click Restore.
2. Wait a few minutes for the restore and reboot.

Note: During the restore process, do not power off or reset the extender.
To reset the extender to factory default settings:
1. Click **Factory Restore** to reset the extender.

2. Wait a few minutes for the reset and reboot.

**Note:**
1. During the reset process, do not power off or reset the extender.
2. We strongly recommend you backup the current configuration settings before resetting the extender.

### 6.6. Change Login Password

The account management feature allows you to change your login password of the management webpage.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to **Settings > System Tools > Admin Account**.
3. Enter the old password, then the new password twice (both case-sensitive) and click **Save**.

4. Use the new password for future logins.

### 6.7. System Log

If the extender is not working normally, you can save the system log and send it to our technical support team.

1. Visit [http://tplinkrepeater.net](http://tplinkrepeater.net), and log in with the password you set for the extender.
2. Go to **Settings > System Tools > System Log**.

**To save the system log locally:**

1. Choose the type and level of the system log as needed.
2. Click Save Log to save the system logs to a local disk.

FAQ

Q1. How do I reset the extender to its factory default settings?
• With the extender powered on, use a pin to press the Reset button until all the LEDs turn on momentarily and then release the button.
• Log in to the extender’s web management page. Go to System Tools > Restore & Backup and click Factory Restore.

Q2. What should I do if I forget my login password?
Refer to FAQ > Q1 to reset the extender, and create a password to log in.
Note: The extender must be reconfigured after a reset to access the internet. Please note down your login password for future use.

Q3. What should I do if I forget my wireless password?
The factory default wireless password is printed on the label of the extender.
If the password has been altered, please connect your computer to the extender using an Ethernet cable and follow the steps below:
1. Visit http://tplinkrepeater.net, and log in with the password you set for the extender.
2. Go to Settings > Wireless > Wireless Settings to retrieve or reset your wireless password.

Q4. What should I do if I cannot access the web management page?
This can happen for a variety of reasons. Please try the following to log in again.
• If your computer is wirelessly connected, make sure that you have connected to the extender’s SSID.
• If your computer is connected via an Ethernet cable, please make sure that the connection is stable.
• Make sure your computer is set to obtain an IP address and DNS server address automatically.
• Verify that http://tplinkrepeater.net or http://192.168.0.254 is correctly entered in the web browser and press Enter.
• Use the IP address to access the extender. The default IP is 192.168.0.254. If the extender is connected to the router, you should go to your router’s DHCP client list to obtain the extender’s current IP address.
• Reset the extender and try again.

Q5. I have enabled wireless MAC filter, wireless access control, or access control list (ACL) on my router. What should I do before configuring
the extender?

When a device connects through the extender to your router, the MAC address of the device shown on the router is translated to another MAC address. If your router’s MAC filter, wireless access control, or ACL is enabled, the devices connected to the extender cannot get an IP address from the extender and cannot access the internet.

To solve this problem, please follow the steps below:

1. Log in to your router and disable the MAC filter, wireless access control or ACL.
   Note: For more information about how to disable your router’s MAC filter, wireless access control or ACL, please refer to your router’s user guide.

2. Power on your extender, and run the Quick Setup to configure your extender.

3. Connect all of your devices to the extended network, and make sure the router’s Link LED remains lit.

4. On your router, add all the Online Devices’ MAC addresses to your router’s MAC filter table.

5. Enable the router’s MAC filter, wireless access control, or ACL to complete the configuration.

E-mail: sales.usa@tp-link.com

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.  
- Increase the separation between the equipment and receiver.  
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.  
2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user’s authority to operate the equipment.
**FCC RF Radiation Exposure Statement:**

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

“To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.”

This device is restricted in indoor environment only.

We, TP-Link USA Corporation, has determined that the equipment shown as above has been shown to comply with the applicable technical standards, FCC part 15. There is no unauthorized change is made in the equipment and the equipment is properly maintained and operated.

Issue Date: 2018-01-18
CE Mark Warning

This is a class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

OPERATING FREQUENCY (the maximum transmitted power)
2400 MHz - 2483.5 MHz (20dBm)
5150 MHz - 5250 MHz (23dBm)
5250 MHz - 5350 MHz (23dBm)
5470 MHz - 5725 MHz (30dBm)

EU Declaration of Conformity
TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of directives 2014/53/EU, 2009/125/EC and 2011/65/EU.
The original EU declaration of conformity may be found at http://www.tp-link.com/en/ce

RF Exposure Information
This device meets the EU requirements (2014/53/EU Article 3.1a) on the limitation of exposure of the general public to electromagnetic fields by way of health protection.
The device complies with RF specifications when the device used at 20 cm from your body.

Restricted to indoor use.

Canadian Compliance Statement
This device complies with Industry Canada license-exempt RSSs. Operation is subject to the following two conditions:
1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
1. l'appareil ne doit pas produire de brouillage;
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, meme si le brouillage est susceptible d'en compromettre le fonctionnement.

Caution:
1. The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;
The high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

DFS (Dynamic Frequency Selection) products that operate in the bands 5250- 5350 MHz, 5470-5600MHz, and 5650-5725MHz.

Avertissement:
1. Le dispositif fonctionnant dans la bande 5150-5250 MHz est réservé uniquement pour une utilisation à l’intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

En outre, les utilisateurs devraient aussi être avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu’ils ont la priorité) pour les bandes 5250-5350 MHz et 5650-5850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

Les produits utilisant la technique d’atténuation DFS (sélection dynamique des fréquences) sur les bandes 5250- 5350 MHz, 5470-5600MHz et 5650-5725MHz.

Radiation Exposure Statement:
This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Déclaration d'exposition aux radiations:
Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

注意!
依據 低功率電波輻射性電機管理辦法
第十二條 經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性或功能。

第十四條 低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方才得繼續使用。前項合法通信，指依電信規定作業之無線電信。低功率射頻電機需忍受合法通信或工業、科學以及醫療用電波輻射性電機設備之干擾。
安全諮詢及注意事項

- 請使用原裝電源供應器或只能按照本產品注明的電源類型使用本產品。
- 清潔本產品之前請先拔掉電源線。請勿使用液體、噴霧清潔劑或濕布進行清潔。
- 注意防潮，請勿將水或其他液體潑灑到本產品上。
- 插槽與開口供通風使用，以確保本產品的操作可靠並防止過熱，請勿堵塞或覆蓋開口。
- 請勿將本產品置放於靠近熱源的地方。除非有正常的通風，否則不可放在密閉位置中。
- 請不要私自打開機殼，不要嘗試自行維修本產品，請由授權的專業人士進行此項工作。

Safety Information

- Keep the device away from water, fire, humidity or hot environments.
- Do not attempt to disassemble, repair, or modify the device.
- Do not use the device where wireless devices are not allowed.
- The socket-outlet shall be installed near the equipment and shall be easily accessible.
• For passthrough devices, plug the power strips into the integrated electrical sockets of the devices, but devices of the same or another type not be stacked in normal use.

Please read and follow the above safety information when operating the device. We cannot guarantee that no accidents or damage will occur due to improper use of the device. Please use this product with care and operate at your own risk.
