

More powerful
More reliable

TL-PB20100

How to use?

Charging the Power Bank (5V/2.4A)

Plug in the Power Bank to a wall charger or your computer's USB port via a USB charging cable.

Charging other devices (Total: 5V/3A)

Plug in the USB charging cable to the Smart port to charge your device.

Checking the Battery status

Press the Power button to check the current battery level. We recommend to charge it when the last indicator LED is blinking.

Flashlight

Press the Power button for 3 seconds to turn on (or off) the LED flashlight.

Attention

- Keep this device away from water, fire, and extreme temperatures.
- Do not deliberately drop or impact this device.
- Do not attempt to extrude or pierce this device, which may cause it to short circuit.
- Do not attempt to disassemble, modify or repair this device yourself.
- Do not use a damaged wall charger or USB charging cable to charge this device.
- If the product appears to be bulging or any other visible abnormalities, stop using the product immediately and contact us or distributor.
- Please recycle this device at an approved disposal location.
- This product is not suitable for those lacking relevant knowledge and experience, please use under the supervision and guidance of professionals.
- Please charge this device once every three months to avoid shortening its battery life.
- Please use the recommended power adapter to charge this device. Power adapter is not provided by TP-LINK.
