Check the following LEDs’ status. If the Internet LED  is on, your router is connected to the internet successfully.

• Power: On
• Internet: On
• Wi-Fi: On

Note: If the Internet LED does not turn on, please refer to Need Help? > Q2 on the back page.

For better internet connection, make sure 2 or 3 bars of the Signal Strength LED are lit. Otherwise, try relocating the router to a spot that may receive a stronger mobile network signal, such as near a window.

Power adapter

Router

a. Install the antennas and position them upwards.

b. With the gold contacts facing down, insert the nano SIM card into the slot until you hear a click.

c. Connect the power adapter to the router.

2. Verify the Hardware Connection

3. Enjoy the Internet

• Wired
  Connect your computer to the router’s LAN port via an Ethernet cable.

• Wireless
  a. Find the SSID (network name) and wireless password printed on the label at the bottom of the router.
  
  Note: For a dual-band router, you can find two default SSIDs. Choose one to join the Wi-Fi.

  b. Click the network icon of your computer or go to Wi-Fi settings of your smart device, and then select the SSID to join the network.
Customize the 4G LTE Router

1. Make sure your computer is connected to the router (wired or wireless).
   Note: If the login page does not appear, please refer to Need Help? > Q1 in this guide.

3. Follow the step-by-step instructions of the Quick Setup to complete the initial configuration.
   Note: The router can also be used (or configured) in Wireless Router Mode for DSL/Cable connections. For more advanced configurations, please refer to the user guide on TP-Link official website at www.tp-link.com.

Need Help?

Q1. What should I do if I cannot access the web management page?
• Reboot your router and try again.
• If the computer is set to a static IP address, change its settings to obtain an IP address automatically.
• Make sure http://tplinkmodem.net or http://192.168.1.1 is correctly entered in the web browser.
• Use another web browser and try again.
• Connect a computer directly to the router via an Ethernet cable. Log in to the router’s web management page.
• The default wireless password is printed on the product label of the router.
• Refer to System Tools > Factory Restore and wait until the reset process is complete.
• With the router powered on, press and hold the button on the rear panel of the router until the Power LED starts flashing, then release the button. Wait until the router reboots.

Q2. What should I do if I cannot access the internet?
• Verify that your SIM card is an LTE or WCDMA card.
• Verify that your SIM card is in your internet service provider’s service area.
• Verify that your SIM card has sufficient credit.
• Verify that your SIM card is an LTE or WCDMA card.
• Log in to the web management page of the router, and go to Advanced > System Tools > Backup & Restore, click Factory Restore and wait until the reset process is complete.

Q3. How do I restore the router to its factory default settings?
• With the router powered on, press and hold the WPS/RESET button on the rear panel of the router until the Power LED starts flashing, then release the button. Wait until the router reboots.
• Log in to the web management page of the router, and go to Advanced > System Tools > Backup & Restore, click Factory Restore and wait until the reset process is complete.
• Refer to Q3 to reset the router, then create a new password to log in.
• The default wireless password is printed on the product label of the router.
• Connect a computer directly to the router via an Ethernet cable. Log in to the router’s web management page and go to Basic > Wireless to retrieve or reset your wireless password.

Q4. What should I do if I forget my web management page password?
• Refer to Q3 to reset the router, then create a new password to log in.

Q5. What should I do if I forget my wireless network password?
• The default wireless password is printed on the product label of the router.
• Connect a computer directly to the router via an Ethernet cable. Log in to the router’s web management page and go to Basic > Wireless to retrieve or reset your wireless password.

Tether App

The TP-Link Tether app provides a simple, intuitive way to access and manage your router.

How to begin?
1. Download the TP-Link Tether app from the Apple App Store or Google Play Store.
2. Ensure your smart device is wirelessly connected to the home network.
3. Launch the Tether app and start managing your home network.
