

## Slim but Powerful

TL-PBB6000

# How to use?

## Charge the Power Bank

---

Plug in the Power Bank to a wall charger or your computer's USB port via a USB charging cable. Please charge the Power Bank before first use.

## Charge other devices

---

Plug in your device to the Power Bank's output port via a USB charging cable.

## Check battery level

---

Press the Power Button to check the current battery level. We recommend charging it when the last LED indicator is blinking.

## Attention

- Keep this device away from water, fire, and extreme temperatures.
- Do not deliberately drop or impact this device.
- Do not attempt to extrude or pierce this device, which may cause it to short circuit.
- Do not attempt to disassemble, modify or repair this device yourself.
- Do not use a damaged wall charger or USB charging cable to charge this device.
- If the product appears to be bulging or any other visible abnormalities, stop using the product immediately and contact us or distributor.
- Please recycle this device at an approved disposal location.
- Please charge this device once every three months to avoid shortening its battery life.
- Please use the recommended power adapter to charge this device. Power adapter is not provided by TP-LINK.
