Set Up a Secure Powerline Network by Pairing (Recommended)

LED and Button Legend

You can create or join a secure powerline network using the Pair button on two devices at a time. Tips: We recommend that you plug in the powerline devices next to each other when pairing.

To create a secure powerline network:

- 1 Press the Pair button on one of the powerline devices for 1 second. Its Power LED **U** starts blinking. Note: If the Power LED does not blink, press the Pair button again.
- 2 Within 2 minutes, press the Pair button on another device for 1 second. Its Power LED U starts blinking.
- 3 When the Powerline LED \oplus is on and stable, it's done.

To join an existing secure powerline network:

- 1 Press the Pair button on any of the existing powerline devices for 1 second. Its Power LED U starts blinking. Note: If the Power LED does not blink, press the Pair button again.
- 2 Within 2 minutes, press the Pair button on the new powerline adapter for 1 second. Its Power LED U starts blinking.
- 3 When the Powerline LED \oplus is on and stable, it's done.

Frequently Asked Questions

Q1. How do I reset my powerline adapter?

A. With the powerline adapter plugged into the electrical outlet, press and hold the Pair button for more than 15 seconds until the Power LED υ goes off momentarily and comes back on.

Q2. How to troubleshoot if there is no internet connection in my powerline network?

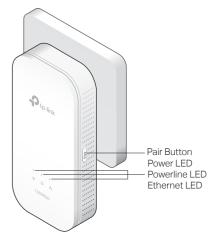

- A1. Make sure all powerline devices are on the same electrical circuit.
- A2. Make sure the Powerline LEDs 🏠 light up on all of your powerline devices. If they do not, reset or pair all your powerline devices.
- A3. Make sure all hardware devices are correctly and securely connected.
- A4. Check if you have an internet connection by connecting the computer directly to the modem or router.
- A5. Make sure your computer's IP address is in the same segment as your router's.

- Q3. What should I do if a successfully-paired powerline device does not reconnect after it has been moved to a new location?
- A1. Try another socket and make sure it is on the same electrical circuit.
- A2. Try to pair it again, and make sure the Powerline LED 1 is on.
- A3. Check for possible interference, such as a washer, air conditioner or other
- household appliance that may be too close to one of the powerline devices.

Using tpPLC utility for advanced configuration:

LED	STATUS	DESCRIPTION
U Power	On/Off Blinking	The powerline adapter is on or off. Once every second: Pairing is in process. Once every 15 seconds: Power-Saving Mode is on.*
1 Powerline	Yellow-green	The powerline adapter is in a location with a good signal strength.
	Red	The powerline adapter is in a location with a poor signal strength. We recommend trying another wall socket.
	Off	The powerline adapter is not connected to any powerline network or is in Power-Saving Mode.
Ethernet	On/Off	The Ethernet port is connected or not connected.
* If the device connected to the adapter is turned off or inactive for more than 5		

minutes, the powerline adapter will automatically switch to Power-Saving Mode.

BUTTON DESCRIPTION

Press and hold for 1 second to set up or join a secure powerline network. Pair Button Press and hold for about 8 seconds to leave an existing powerline network. Press and hold for more than 15 seconds to reset the powerline adapter.
