

# Quick Installation Guide

Applicable Model: RE500

## **LED** Explanation

#### (A) (RE)

Solid blue: The extender is connected to your router's wiresless network and is in a suitable location.

Solid red: The extender is experiencing poor signal strength. Try relocating it closer to your router.

Flashing: WPS connection is being established.

Off: No wireless connection is established.

## **Button Explanation**

LED button: To turn on or off all the LEDs, press the LED button. Power button: To turn on or off the extender, press the Power button.

#### 2.4GHz/5GHz

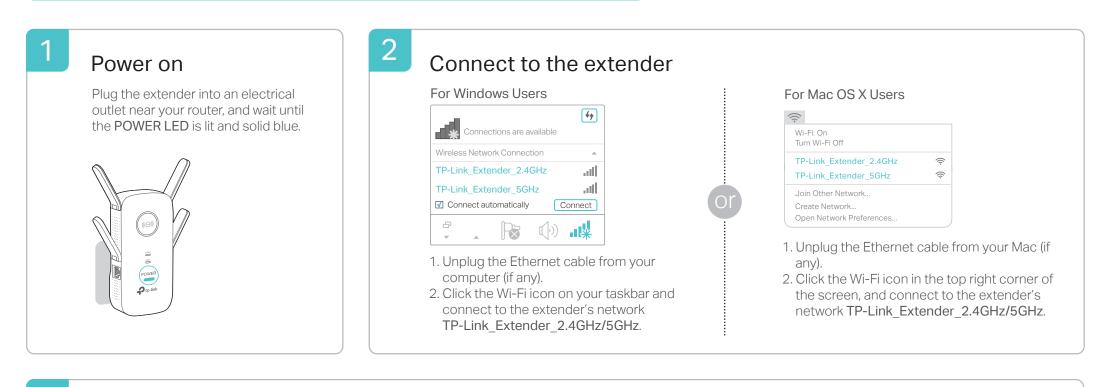

On: The extender is connected to the 2.4GHz/5GHz wireless network of your host router. Off: No connection.

### POWER

On: The extender is on. Blinking: The extender is starting up. Off: The extender is off.

## Option ONE Quick Setup Using a Web Browser

# 3

### Configure

1 Launch a web browser and enter http://tplinkrepeater.net or http://192.168.0.254 in the address bar. Create a password for future login attempts, and click Start.

2 Select your router's 2.4GHz/5GHz host network and enter its password. Then click Next.

Hz Ho	ost Netv	vork	W	/ireless Settings	
lease	select	2.4GHz Host network or skip this	network.		
	ID	SSID	Signal	MAC Address	Securi
۲	1	Your router's wireless name	lltr,	30:B5:C1:33:99:76	
		Host 2.4GHz Password: 12	345678	Next

				Exit Other Re	scan

network, please click Skip to continue

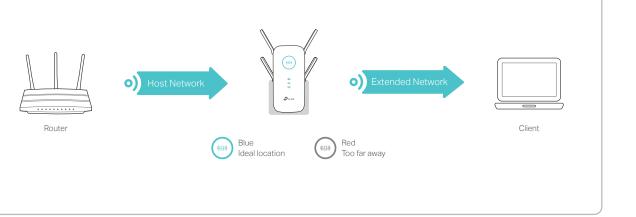

3 Either keep the default SSIDs or customize them for the extended networks, and then click Next.

2.4GHz Host Network	•	Wireless Settings	
Extended 2.4GHz SSID:	Your network name	Copy Host SSID	
	Hide SSID broadcast		
The extended 2.4GHz pa	assword is the same as your	Host password.	
Extended 5GHz SSID:	Your network name_8	G Copy Host SSID	
	Hide SSID broadcast		
The extended 5GHz pas	sword is the same as your H	lost password.	
		Back	Next

4 Verify your wireless settings and click Save. The corresponding LED(s) (24GHz / 5GHz )

### Relocate

- 1 Plug the extender into an electrical outlet about halfway between your router and the Wi-Fi dead zone. The location you choose must be within the range of your host network.
- 2 Wait until the (A) LED is lit and solid blue. If not, relocate it closer to the router to achieve better signal quality.

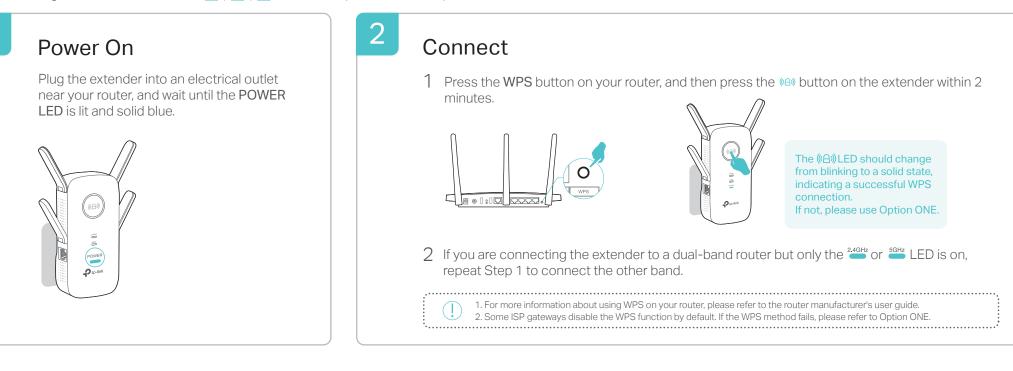

Both extended networks share the same Wi-Fi passwords as those of your host networks, but may have different wireless network names (SSIDs) if you have customized them during the configuration.

## Option TWO Quick Setup Using the WPS Button

WPS is an easier way to extend your host network. You are recommended to use this method if your host router has a WPS button. The button might look like one of these: () | | | | | | | | Otherwise, please refer to Option ONE.

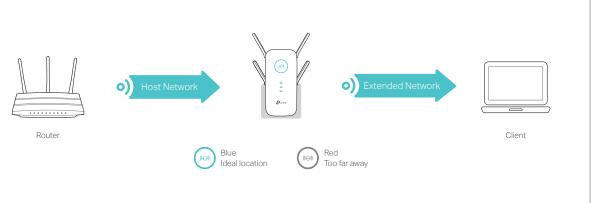

### Relocate

**Enjoy!** 

3

- Plug the extender into an electrical outlet about halfway between your router and the Wi-Fi dead zone. The location you choose must be within the range of your host network.
- 2 Wait until the (A) LED is lit and solid blue. If not, relocate it closer to the router to achieve better signal quality.

# Entertainment Adapter

The extender can be used as a wireless adapter to connect any Ethernet-only device such as a Blu-ray player, game console, DVR, or smart TV to your Wi-Fi network.

First, connect the extender to your router using Option ONE or Option TWO. Then connect your Ethernet-only device to the extender via an Ethernet cable.

# **TP-Link Tether App**

Tether provides a simple, intuitive way to access and manage your extender with your iOS or Android devices.

Both extended networks share the same wireless network names (SSIDs) and passwords as those of your host networks.

Set up the extender Modify wireless settings

Block unwelcome devices

How to
begin?
1. Download the Tether app from the App Store or Google Play Store.
2. Ensure your device is wirelessly connected to the extender or to the host router.

3. Launch the app and start managing your extended network.

Turn on/off the LEDs

## Frequently Asked Questions (FAQ)

# Q1. What should I do if I cannot access the extender's web management page?

- If your comupter is wirelessly connected, make sure that you have connected to the extender's SSID.
- If your computer is connected via an Ethernet cable, please make sure that the connection is stable.
- Make sure your computer is set to obtain an IP address and DNS server address automatically.
- Verify that http://tplinkrepeater.net or http://192.168.0.254 is correctly entered in the web browser and press Enter.
- Reset the extender and try again

If the problem persists, please refer to the FAQ at www.tp-link.com for details.

#### Q2. How do I restore the extender to its factory default settings?

• With the extender powered on, use a pin to press and hold the **Reset** button until all the LEDs turn on momentarily, and then release the button.

# Q3. What should I do if the (A) LED does not change to solid after completing Option ONE?

- You may have entered the incorrect Wi-Fi passwords for your host networks during the configuration. Please log in to the extender's web management page to check the password and try again.
- If the (A) LED still doesn't change to solid, please reset the extender and go through the configuration again.
- Q4. I have enabled a wireless MAC filter, wireless access control, or access control list (ACL) on my router. What should I do before configuring the extender?
  - If you have enabled those features of your host router, you may need to disable them first, and then follow Option ONE or Option TWO to complete the configuration.
