Quick Installation Guide

AV500 Nano Powerline Adapter
Applicable to TL-PA4010 and its multiple-pack kits

Plug and Play

1. Connect the Powerline adapter to the router using an Ethernet cable.
2. Plug the Powerline adapter into a wall socket on the same electrical circuit.
3. Wait until the Powerline LED turns on.
4. Enjoy!

More: To add additional Powerline adapters or extenders with the default settings, simply plug them into the wall sockets on the same electrical circuit.

Attention

- Wall Outlet
- Power Strip
Set Up a Secure Powerline Network by Pairing (Optional)

Paring is used to create or join a secure powerline network.

To create a secure powerline network:
1. Press the **Pair** button on one adapter.  
2. Press the **Pair** button on another adapter.  
3. Done.

To join an existing secure powerline network:
1. Press the **Pair** button on any powerline adapter in the existing powerline network.  
2. Press the **Pair** button on the new adapter.  
3. Done.

**FAQ (Frequently Asked Questions)**

Q1. How to troubleshoot if there is no Internet connection after pairing the adapters?
   A1. Check if you have an Internet connection by connecting the computer directly to the modem or router.
   A2. Check the hardware connection between your modem and router.
   A3. Make sure all the Powerline LEDs are on. If they are not, reset or pair all your powerline adapters again.
   A4. Make sure your computer's IP address is in the same segment as your router's.
   A5. Make sure all powerline adapters are on the same electrical circuit.

Q2. What can I do if a successfully-paired powerline adapter does not reconnect after it has been moved to a new location?
   A1. Make sure all powerline adapters are on the same electrical circuit.
   A2. Try to pair it again with another adapter, and make sure the Powerline LED is on before moving it to a new location.
   A3. Check for possible interference, such as washers, air conditioners or other household appliances that may be too close to one of the powerline adapters.

**LED and Button Legend**

<table>
<thead>
<tr>
<th>LED</th>
