Tether App

The TP-LINK Tether app provides a simple, intuitive way to access and manage your router.

How to begin?

1. Download the TP-LINK Tether app from the Apple App Store or Google Play.

2. Ensure your smart device is wirelessly connected to the home network. 3. Launch the Tether app and start managing your home network.

Scan to download

More Features

The TP-LINK router supports various features, including Guest Network, Parental Controls, Access Control and more.

You can log into the router's web management page http://tplinkwifi.net to apply these functions. For instructions, please refer to the User Manual at www.tp-link.com.

FAQ (Frequently Asked Questions)

1. What can I do if the login window does not appear?

- If the computer is set to a static or fixed IP address, change the settings to obtain an IP address automatically.
- Verify if http://tplinkwifi.net or http://192.168.0.1 is correctly entered in the web browser. Alternatively, enter http://192.168.1.1 in the web browser and press Enter.
- Use another web browser and try again.
- Reboot your router and try again.
- · Disable then re-able the network adapter being used.

2. What can I do if I cannot access the Internet?

- · Check if the Internet is working properly by connecting a computer directly to the modem using an Ethernet cable. If it is not, contact your Internet Service Provider.
- Log into the web management page of the router, and go to the Status page to check whether the WAN IP address is valid or not. If it is, please run the Quick Setup again; otherwise, recheck the hardware connection.
- Reboot your router and try again.
- For cable modem users, log into the web management page of the router. Go to Network > MAC Clone, click Clone MAC Address and click Save. Then reboot both the modem and the router.

Q3. How do I restore the router to its factory default settings?

- With the router powered on, use a pin to press and hold the WPS/RESET button on the back panel of the router for about 8 seconds.
- Log into the web management page of the router, and go to System tools > Factory Defaults, click Restore. The router will restore and reboot automatically.

Q4. What can I do if I forget my web management page password?

• Refer to FAQ > Q3 to reset the router, and then use the default admin (all lowercase) for both username and password to log in.

Q5. What can I do if I forget my wireless network password?

- The factory default wireless password is printed on the label of the router.
- Connect a computer directly to the router using an Ethernet cable. Log into the router's web management page, and go to Wireless > Wireless Security to obtain or reset your wireless password.

If your questions are not listed here, please refer to the support page at www.tp-link.com.
