Chapter 1. Overview

Print server is a function embedded in your Router. It allows you to share your printer with computers that are connected to the Router.

Typical Topology

Note:

- (1) The client utility TP-LINK USB Printer Controller supports Windows 7 32/64 bit, Windows Vista 32/64bit, Windows XP 32/64bit, and Mac.
- (2) Before connection, please check the **Printer Compatibility List** to verify whether your printer is supported by the Router. You can refer to **Appendix: Troubleshooting** for downloading the Printer Compatibility List.
- (3) Here in this guide, we take the configuration procedures of TL-WDR4300 for example.

Chapter 2. Before Installation

Before installing the print server, please note the following points:

- ✓ Make sure you have already installed the printer's driver on your computer. Otherwise, please install it first.
- ✓ Any computer in your LAN must first install the software if it wants to share the print server via the Router.

Before installing the print server, make sure you have the following devices and accessories:

- ✓ TP-LINK Router with USB port which supports print server function
- ✓ USB printer and USB cable
- ✓ Computer with Windows XP/ Windows Vista/ Windows 7/ Mac
 - Solution Note:

For Mac or Windows computers that do not have CD-ROM drive to run the resource CD, please download the relevant software from our website: **www.tp-link.com**. Please refer to **Appendix: Troubleshooting** for this.

Chapter 3. Installation for Windows OS

1. Insert the Router's Resource CD into the CD-ROM drive.

2. Select your Router model and click **USB** *Printer Setup*.

3. Click **START**.

4. Connect your computer and printer to the Router step by step as instructed. Click **NEXT**.

5. Check the LED lights and click **NEXT**.

< Back Next >	Cancel

10. Click *Change...* to select another destination folder, or leave it default and click *Next*.

11. Click *Install* to begin the installation.

12. Please wait a while for the installation process.

13. Click *Finish* to complete and exit the **InstallShield Wizard**.

When the installation is completed, the TP-LINK USB Printer Controller will pop up, with whose help you can print documents via the Router now.

Note:

In your LAN, each computer that wants to share the print server should also install the **TP-LINK USB Printer Controller**. Please follow the previous steps to configure other computers in your LAN.

Chapter 4. Application for Windows OS

TP-LINK USB Printer Controller is used to operate the USB Printer on your own computer. After successful installation, the icon will appear on the desktop of your computer.

4.1 To Launch/Exit the TP-LINK USB Printer Controller

> To launch the USB Printer Controller, double-click the icon

- > To exit the USB Printer Controller, you have two ways:
 - Click System->Exit on the TP-Link USB Printer Controller.

• Right-click the icon 🛃 in the lower-right corner of your screen and then click *Exit*.

4.2 To Utilize the TP-LINK USB Printer Controller

4.2.1 To Print

To print, first of all, you need to set your **Auto-Connect Printer**. After successful setting, you can execute your printing tasks automatically.

Please follow the steps below to set your auto-connect printer.

Step 1: Highlight the printer you want to set as auto-connect printer.

Step 2: Click the inverse triangle mark on the Auto-Connect for printing tab to pull down the list, where you can select Set Auto-Connect Printer.

Step 3: Tick the name of the printer you would like to set as auto-connect printer, and then click *Apply*.

🛹 Add to Auto-Connect Printer List	
< Installed Printer List >	
Printer Name	
🗹 蒆 Canon MG6200 series Printer <mark>recommended</mark>	
Canon MG6200 series Printer XPS	
Apply	Cancel

After successful setting, you will see the printer marked as **Auto-Connect Printer**. Then you can execute your printing task freely.

- - -

> If you want to disable your printer's auto-connect function, you can delete it.

Method One:

Select *Delete Auto-Connect Printer* from the drop-down list of the **Auto-Connect for Printing** tab.

Method Two:

1. Go to **Tools->Auto-Connect Printer List**.

•Z.

Appendix: Troubleshooting

1. Where can I find the printer compatibility list?

Go to our website *www.tp-link.com*, then go to **Products** ->**Wireless**, find your product model and go to **Download** -> **Document** -> **Printer Compatibility List**.

2. Where can I find the relevant software for installation?

Go to our website *www.tp-link.com*, then go to **Products** ->**Wireless**, find your product model and go to **Download** ->**Software** -> **Utility**. Then next web page will be loaded, where you can select the **USB Printer Controller_Utility** and download it.

3. How to manage the print server on the web-based management page?

The Router's Print Server function is enabled by default. To disable the function, you need to log onto the Web-based management page. See the following instructions (Here takes that in Windows 7 for example):

- 1) Make sure you have a PC or notebook connected to the wireless Router, either via wireless or wired connection.
- 2) Launch the TP-LINK USB Printer Controller, highlight the Router and click the tab *Configure Server*.

 After a moment, a login window will appear. Enter admin (in lower case letters) for both the User Name and Password. Then click the OK button or press the Enter key.

4) Go to **USB Settings -> Print Server**. Clicking **Stop** will disable the function and clicking **Start** will enable it.
