

## How to Use the Remote Storage Sharing (FTP) Feature

The RemoteStorage Sharing feature allows you to share a USB storagedevice that's connected to the router, (USB Drive or mobile Hard Disk Drive) to other users on the other side of Internet.

## HOW TO SET UP:

Plug the USB storage into the USB port of the TP-LINK router and wait until the USB LED is solid green.

You can setup the Remote Storage Sharing by the following steps:

**Step 1** Open a web browser (IE/Chrome/Firefox/Safari), type **tplinklogin.net** in the address bar, and then press Enter button.

**Step 2** Type the username and password in the login page, the default username and password are both **admin** (in lower case), then click OK to log into the router, Click **USB Settings** -> **FTP Server** on the left side menu.

USB Settings
- Storage Sharing
- FTP Server
- Media Server
- Print Server
- User Accounts

**Step 3** Before configuring the FTP Server, the USB storage device must be recognized first. Click **Add New Folder to Share** button.

FTP Server Configuration			
Server Status:	Started Stop		
Internet Access:	Enable		
Service Port:	21 (The default is 21, do not change unless necessary.)		
Internet Address:	0.0.0.0		
Add New Folder to Share			

**Step 4** Click on the volume you want to share. You can also **share the entire partition**. Customize the Display Name and click **Save**.

Display Name: Partition:	folder1	
Folder Location:	1	
Select	Folder	
o e	volume1 volume2	R€
c	volume2	-013 

**Step 5** Your shared folders will be listed on the FTP home page.

Note: If you want to share the content to users on the other side of Internet, you can enable the **Internet Access.** Please select **Enable**. Then click **Save**. In the end, click **Start** to start the FTP function.

Server Status: Stopped Start 3   Internet Access: © Enable Disable   Service Port: 21 (The default is 21, do not change unless necessary.)   Internet Address: 83.55.232.89				
	Partition	Folder	Modify	
Name	T GT G G G G			

Step 6 Click USB Settings -> User Accounts to edit or create a new account.

The default two accounts are admin and guest.

Status	-

## Access the Storage in Local Network

Please open the web browser or the third party FTP client software, type in address **ftp://tplinklogin.net**and press enter. Then type in your account to access to the FTP server.

Note: The default Read and Write account is admin/admin; the default Read Only account is guest/guest.

Log On a	As		×	
9	Either the server does not allow anonymous logins or the e-mail address was not accepted.			
	FTP server:	192.168.0.1		
	<u>U</u> ser name:	admin 🗸		
	Password:	•••••		
	After you log on, you can add this server to your Favorites and return to it easily.			
⚠	FTP does not encrypt or encode passwords or data before sending them to the server. To protect the security of your passwords and data, use Web Folders (WebDAV) instead.			
	Learn more about using Web Folders.			
	Log on anonymously			
		Log On Cancel		

## Access the Storageon the Other Side of Internet

Please open the web browser or the third party FTP client software, type in address **ftp://Your Router's Internet Address** and press enter. Then type in your account to access to the FTP server.

Note: The Internet Address is showed on the page

Note: The default Read and Write account is admin/admin; the default Read Only account is guest/guest.

FTP Server Configuration			
Server Status:	Started Stop		
Internet Access:	Enable 💿 Disable		
Service Port:	21 (The default is 21, do not change unless necessary.)		
Internet Address:	0.0.0.0		

Note:

Some USB storage devices may require using the bundled external power.

If the FTP server can't take effect immediately, please wait a few minutes.Or restart the service by clicking stop/start button.

To setup different accounts for access rights protection, please log into to the Web management page and set it on USB Settings > User Accounts.
