

Advanced Management Features for Surveillance

Monitoring Center

- Up to 64-Channel Live Views.
- Customize views and quickly access frequently used monitoring devices.

Visual Map Across Sites

Visualize your system distribution from maps and floor plans.

Unified Evidence Management

Powerful evidence collection and management from multiple sources.

AI-Powered Monitoring

- Highlight the people and vehicles detected in live monitoring.
- Automatically blur faces on videos for better privacy protection.

VCA-Based Smart Search

Easily search for people or vehicles and locate related footage by characteristics.

Optional Cloud/Local Deployment

Flexibly deploy and operate VMS locally or via the cloud.

Abundant Products

VIGI C445

VIGI 4MP Full-Color Turret Network Camera

VIGI C345

VIGI 4MP Outdoor Full-Color Bullet Network Camera

VIGI NVR2016H-16MP-4TB

VIGI 16 Channel PoE+ Network Video Recorder

SX3206HPP

Omada 6-Port 10G L2+ Managed Switch with 4-Port PoE++

SG2005P-PD

Omada 5-Port Gigabit Smart Switch with 1-Port PoE++ In and 4-Port PoE+ Out

EAP215-Bridge KIT

Omada Wireless Bridge 5 GHz 867 Mbps Long-Range Indoor/Outdoor Access Point

Integrated Network and Video Surveillance Solution

Router & Switch | Access Point | Network Camera | NVR & NVD | Management System

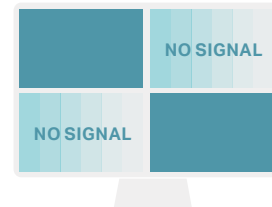

Omada Central Overview

Challenges to Users

Different teams deploying surveillance and network devices across systems raise deployment challenges and costs.

Network instability may delay the audio and video transmission of cameras, affecting responses to security events.

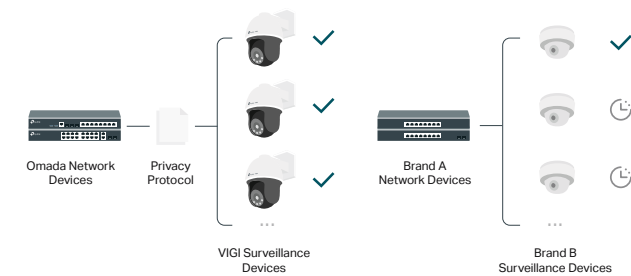

Separate maintenance of surveillance and network systems makes it hard to quickly diagnose whether an issue is due to networking or surveillance problems.

Our Triple Guarantee

High-Efficiency Deployment & Management

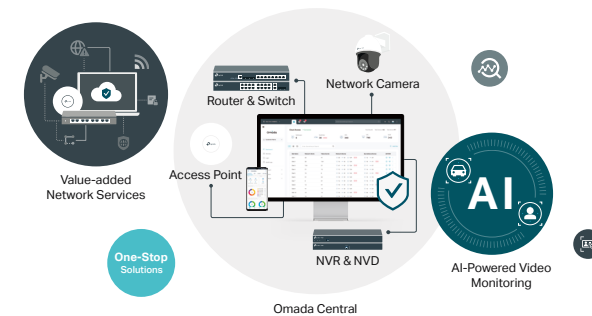

➤ Easily Set up All Devices on a Unified Platform

Configure both the Omada network and VIGI surveillance devices seamlessly through the Omada Central platform. Conveniently assign VLANs to VIGI products to streamline deployment.

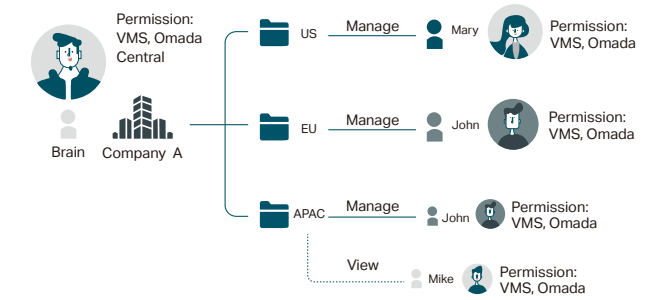

➤ Unified Management

Manage and maintain your network and surveillance devices across sites with a single interface.

➤ Assign Different Management Roles

- Multi-Customer Management
- Multi-Account Management
- Multi-Site Management
- Multi-Person Management
- Multi-Role Management
- Multi-Level Permissions

➤ Quick Troubleshooting for Network and Surveillance

Our integrated platform supports the construction of topology diagrams, letting you see the entire deployment of your network and surveillance system.

➤ 24/7 Intelligent Anomaly Detection

We support 24/7 intelligent anomaly detection and provide some optimization suggestions and solutions to ensure the safety of VIGI video transmissions.

Omada Network Empowers VIGI Surveillance

Automatic Topology Recognition

Automatically detect and add VIGI devices to the Omada network topology, helping IT admins quickly see and troubleshoot connections at a glance.

Quality of Service

Prioritizes identification and allocation of traffic to VIGI security video in congested networks.

Traffic Isolation

Divides traffic for downlink ports and isolates broadcast storm for higher network security and performance.

Reliable Network Foundation for Surveillance

No.1 Solid Brand Endorsement

TP-Link has led the network market as the No. 1 WLAN equipment supplier for 13 consecutive years.*

Full Range of Business Products

Omada provides a complete set of business devices from controllers, access points, and routers to switches.
