

Recycle your old Electronic and Electrical Equipment (EEE) products and help protect environment

E waste means electronic equipment discarded as waste by the consumers as well as rejects from manufacturing, refurbishment and repair processes.

E-waste when disposed or recycled improperly, can cause severe environmental pollution and adversely affect human body as they contain excess of toxic chemicals like mercury, polybrominated flame retardants, barium, lithium and PVC. The traditional process of burning and disposing of e-waste releases toxic gases into the atmosphere, causing severe air pollution. Besides that, poor recycling and improper disposal of e-waste leads to pollutants such as heavy metals and persistent organic compounds be released into the atmosphere, which pollutes the eco-system and causes health hazards. Alternately, practices of dumping of e-waste into landfills for disposal eventually releases the hazardous and toxic components seep into the eco-system including into the regional water tables, causing soil pollution and contaminating the water table. Such contamination will affect nearby communities in an adverse manner for much longer time.

Further, accidental breakage and damage of electronics and e-waste can pose a threat to the environment. As these electronics contain toxic components as long as they are enclosed within the original manufacturer's designed outer-shell of the gadget, they may not pose much of a danger as they may have been engineered to sustain any adverse effects. However, accidental breakage or damage of such electronics or e-waste can lead to toxic elements leaking and contaminating the immediate environment. Damage to the environment due to accidental breakage of e-waste is a major concern and consumers need to ensure that they dispose e-waste only at authorized recycling centres in the prescribed manner.

Brief on General Scheme of Collection:

We have partnered with **Z-Enviro Industries**, registered with TSPCB for management and recycling/ dismantling of all of our e-waste.

It is part of our agreement that **SAFEXPRESS PRIVATE LIMITED** collects e-waste from the collection centers and carry them to the **Z-Enviro Industries** plant in environmentally safe and sound manner for the proper recycling of e-waste.

Z-Enviro Industries have all the authorization related to e-waste dismantling and recycling from Hyderabad SPCB and having all connects related to air/water/hazardous waste. Their capacity is **30,000 TPA**.

We have partnered with Logistics Company **SAFEXPRESS PRIVATE LIMITED** for door to door collection of e-waste.

As per our agreement, environmentally safe and sound transportation and handling of all our e- waste collected from door to door service will be done by Logistics partner.

As per our agreement with **SAFEXPRESS PRIVATE LIMITED** if any customer wants to handover their old product, they can reach out to us on our **Toll-Free No. 1800-209-4168** and register themselves.

Once registered, request for the pick-up will transferred to our Logistics Partner.

Details of our Collection Centre/Points

The collection centers meant for collection of material from end user and channelizing the same through our e—waste management partner **SAFEXPRESS PRIVATE LIMITED** We will update CPCB time to time detail of our collection centers/Services centers expansion PAN INDIA.

Do's:

- a) Always look for information in the product's user's guide for end-of-life equipment handling.
- b) Ensure that only authorized recyclers handle your electronic products.
- c) Always call local authorized e-waste collection centers to dispose products that have reached end-of life.
- d) When your used electronic products, batteries or accessories reach the end of their life, always dispose of them at your nearest authorized e-waste collection center.
- e) Wherever possible or as instructed, separate the packaging material according to responsible waste disposal options and sorting for recycling.
- f) Always ensure any glass surface is protected against breakage.
- g) Kindly ensure that the product is properly packaged before it is handed over to the authorized Recycler.

Don'ts:

- a) Do not dismantle your electronic products on your own.
- b) Do not throw electronics in bins having "Do not Dispose" sign on the product package.
- c) Do not give e-waste to informal and unorganized sectors like local scrap dealers.
- d) Do not dispose of your product in garbage bins along with municipal waste that ultimately reaches landfills.

Be a Responsible User. Recycle your E-waste for a Greener Planet.
