*VIGI Cloud VMS provides two versions: the Essential version, which offers free cloud services, and the Standard version, which includes advanced features like Heatmap, and Customer Flow Analytics and Queue Management, and requires a license.The Standard version will be available in Q4 2024.
Solution Highlights

Unlimited Store Expansion

The cloud-based solution allows for unlimited and cost-free* expansion of your stores and devices, thereby reducing store opening expenses.

Multi-User Privilege Management

Assign varying permissions to members for each store, such as Admin, Viewer and Live Only. This ensures members access only necessary resources.

Manage Multiple Stores from Anywhere

Manage your devices, view live monitoring and playback, and receive real-time alerts using the VIGI app, Web Portal, or VIGI PC Client—all without the need of a VPN.

Simple Deployment and Maintenance

Designer Tool for Quick Project Proposal Creation
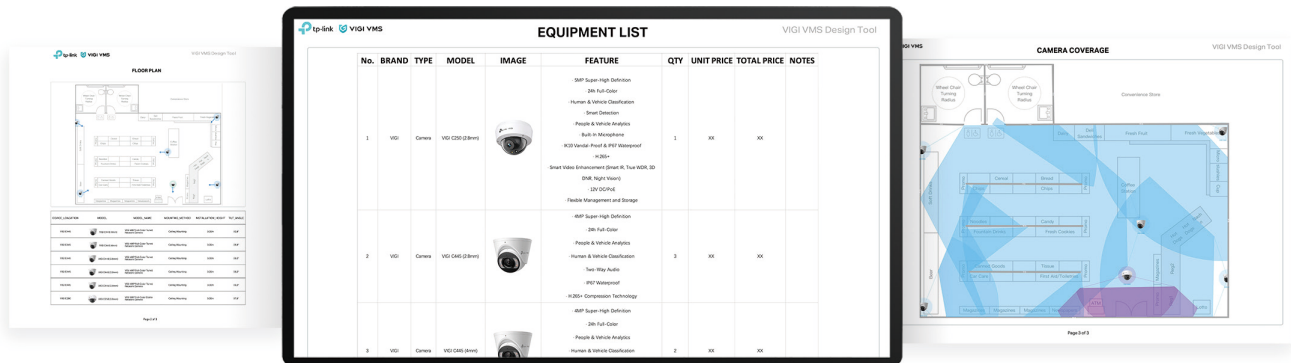

- Intelligent Filters for Rapid Product Selection
- User-Friendly Interface Design
- Professional Monitoring Coverage Display
- Intuitive Image Clarity Display
- 2D/3D View for Accurate Installation Simulation
- Generate a Project Proposal in Minutes

Opening A New Store Requires Just 6 Minutes

3 Minutes to Create a New System

2 Minutes to Add Devices

1 Minute to Expand a Store

An App Handles Daily Management

*For Essential Version only.

Auto Search and Add Devices

The VIGI app automatically detects devices under the same LAN and adds them in batches for hassle-free setup. This speeds up installation efficiency and reduces labor costs.

Zero-touch Maintenance

No more on-site technicians and maintenance fees required, saving labor costs and ensuring a timely response to system failures.

Remote Configuration and Initialization

Online & Auto Firmware Upgrades

Troubleshoot Without On-site Visits
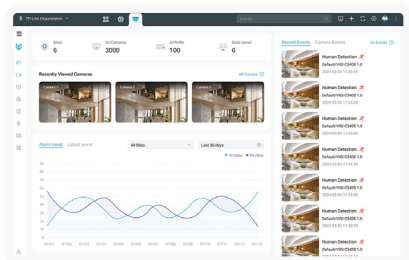

Real-time Device Heath Alarm

AWS-Based Security

VIGI Cloud VMS, hosted on AWS servers and maintained by the TP-Link team around the clock, ensures high availability and robust security.
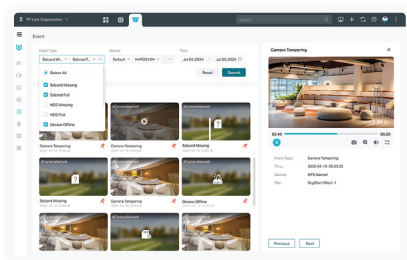

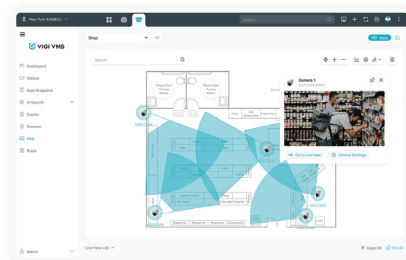

Practical Video Monitoring Features

Rich user-friendly video monitoring features, such as a visual dashboard, up to 64-channel* live views, event and time-based playback, real-time map monitoring, and unified event management, providing full site understanding without onsite visits.

Map Monitoring

Advanced Cross-Store Management Features

Beyond basic video monitoring, VIGI Cloud VMS also provides advanced cross-store management features to improve insights into customer behavior and cross-store management efficiency. These enhancements are supported by standard version and require a license.
Intelligent Chain Store Patrol△

Compared with manual store inspections, real-time or scheduled ones save on labor costs and enhance chain store management by quickly uncovering hazards and assessing store operations.

Cross-Store Customer Flow Analysis△

Analyzing customer flow at each store enhances staff allocation for better service and allows monitoring of marketing campaign effectiveness.

*Supported only on VIGI VMS PC Client. The actual number of live views is also limited by the performance of the device and computer.
△These features will be available in Q4 2024.

Other Value-Added Highlights

Trusted Quality

- Independent R&D
- Superior Suppliers
- Vertical Integration
- Complete Quality Control

Superb Pre- and After-Sales Services

- Certification and Training (TPSA)
- Replacement and Warranty
- Localization Support Teams
- Lightweight Designer Tools
- Dedicated Online Support
- Official Community
