# **Quick Installation Guide**

Archer C5

Note: If the 2.4G LED 🛜 and 5G LED 🛜 are off, please press the Wi-Fi On/Off button on the side panel for 2 seconds and check the LEDs again in a few seconds later.

🖻 🕾 🖵 🎜 🕼 ψ ψ 🕰

For optimum performance, orient the antennas as shown in the drawing beside.

# **Configure via Web Browser**

### 1. Connect your computer to the router (Wired or Wireless)

### Wired

Turn off the Wi-Fi on your computer and connect the devices as shown below.

### Wireless

Connect wirelessly by using the SSID (Network Name) and Wireless Password/PIN printed on the product label at the bottom of the router.

Wireless Password/PIN20000000
SSID-TP-LINE_0000 SSID-TP-LINE_0000_5G

### 2. Configure the router using a web browser

A Enter http://tplinkwifi.net or http://192.168.0.1 in the address bar of a web browser. Use admin for both username and password, and then click Login.
 Note: If the login window does not appear, please refer to FAQ > Q1.

http://tplinkwifi.net	$O \rightarrow$
admin	
Login	

**B** Follow the step-by-step instructions of the Quick Setup to complete the initial configuration.

#### Notes

1. For IPTV/VoIP users, please select your connection type and proceed with the setup; for others, please choose **Normal Mode** and then the WAN connection type. If you are not sure, please contact your ISP.

2. For users that do not use IPTV/VoIP service, please click **Auto-Detect** if you are not sure of the WAN connection type, then click **Next** to proceed with the setup.

3. You are recommended to change the default wireless network names and passwords. Once done, you have to reconnect to your Wi-Fi network using the new wireless network name and password.

Wireless 2.4GHz:	OFF		
Network Name(SSID): TP-	LINK_7AFF		
Password: 123	45670		
Wireless 5GHz:	OFF		
Network Name(SSID): TP-	LINK_7AFF_5G		
Password: 123	45670		

## **USB** Features

Use the USB ports for media sharing, storage sharing and printer sharing across your local network. You can also set up an FTP server to access your files remotely through the Internet.

Note: To learn more about the USB features, visit

http://www.tp-link.com/app/usb, or simply scan the QR code using your mobile devices.

С

# **Configure via Tether App**

- TP-LINK's Tether app lets you conveniently access the router and:
- View information about the clients on your network.
- Block network access from specific users or devices.
- Set up Parental Controls with access time and content restrictions.
- Change the basic wireless network settings easily.

## How to start?

- 1 Scan the QR code to download the TP-LINK Tether app from the Apple App Store or Google Play.
- 2 Ensure your smart device is wirelessly connected to the home network.
- 3 Launch the Tether app and start managing your home network.

## FAQ (Frequently Asked Questions)

### Q1. What can I do if the login window does not appear?

- If the computer is set to a static or fixed IP address, change the setting to obtain an IP address automatically.
- Verify if http://tplinkwifi.net or http://192.168.0.1 is correctly entered in the web browser. Alternatively, enter http://192.168.1.1 in the web browser.
- Alternatively, enter http://192.168.1.1 in the web bro
  Use another web browser and try again.
- Reboot your router and try again.
- Disable and enable the the network adapter in use again.

### Q2. What can I do if I cannot access the Internet?

- Check if the Internet is working properly by connecting a computer directly to the modem via an Ethernet. If it is not, contact your Internet Service Provider.
- Open a web browser, enter http://tplinkwifi.net or http://192.168.0.1 and run the setup again.
  Reboot your router and try again.
- For cable modem users, reboot the modem first. If the problem still exists, log in to the Web Management page of the router, and go to Advanced > Network > Internet > MAC Clone,
- click Clone MAC Address and then click Save.

### Q3. How do I restore the router to its factory default settings?

- While the router is powered on, press and hold the  $\mbox{Reset}$  button on the back until the  $\oplus$  LED blinks.
- Log in to the Web Management page of the router, and go to Advanced > System Tools > Factory Defaults, click Restore. The router will restore and reboot automatically.

### Q4. What can I do if I forgot my Web Management password?

• Refer to FAQ > Q3 to reset the router, and then use the default **admin** (all lowercase) for both username and password to log in.

### Q5. What can I do if I forgot my wireless network password?

- If you have not changed the default Wireless Password, it can be found on the product label of the router.
- Log in to the Web Management page, go to Basic > Wireless to retrieve or reset your wireless password.
