TP-LINK®
The Reliable Choice

Quick
Installation Guide

EAC

For more information, please visit http://www.tp-link.com.
---

1 Connect to a Computer

Insert the adapter into a USB port on your computer directly.

Note: In Windows XP, a Found New Hardware Wizard window will appear when the adapter is detected. Please click Cancel.
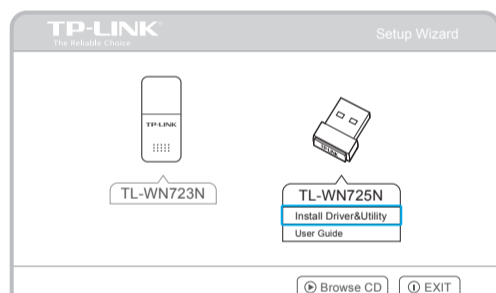

---

2 Install Driver and Utility

You can also download the driver and utility at www.tp-link.com.
A: Insert the CD.

B: **For Windows**

Run the Autorun.exe on the pop-up window.
Select TL-WN725N and click Install Driver&Utility, then follow the InstallShield Wizard to complete the installation.

For Mac OS X

Browse the CD, go to TL-WN725N_WN723N > Mac OS X Driver, unzip the Mac OS X 10.7_10.10.zip file and run the Installer.
Follow the wizard to complete the installation.

---

3 Join a Wireless Network

For Windows

For Windows Vista, TP-LINK Utility is not supported, please use the Windows built-in Wireless Utility to join a network.

Option 1: Via TP-LINK Utility

Select your Wi-Fi network from the pop-up utility window and click Connect. The symbol indicates a successful connection.

Option 2: Via Windows Wireless Utility

Click (Network icon) on the system tray, select your Wi-Fi network, and click Connect.

Note: In Windows XP, you need to close the TP-LINK Utility before using the Windows Wireless Utility.

For Mac OS X

In the TP-LINK Utility, select the Available Network tab of the pop-up utility window.
Select your Wi-Fi network and click Connect. The connection status can be viewed on the Link Status screen.
