Quick Installation Guide

450Mbps Wireless N Router

TL-WR940N

Connecting the Hardware

If your Internet connection is through an Ethernet cable from the wall instead of through a DSL / Cable / Satellite modem, connect the Ethernet cable directly to the router's Internet port, and follow Step 4 and 5 to complete the hardware connection.
Power adapter

Router

4 Turn on the router.

Internet

Power adapter

Modem

1 Turn off the modem, and remove the backup battery if it has one.

2 Connect the modem to the Internet port on your router with an Ethernet cable.

3 Turn on the modem, and then wait about **2 minutes** for it to restart.

5 Verify that the hardware connection is correct by checking these LEDs.

Power On	2.4G On	Internet On

Note: If the 2.4GHz LED is off, please press and hold the Wi-Fi/WPS button on the rear panel until the 2.4GHz LED is on.

Configuring the Router

1. Connect your computer to the router (Wired or Wireless)

Wired

Turn off the Wi-Fi on your computer and connect the devices as shown below:

Ethernet cable

Wireless

a Find the SSID (network name) and Wireless Password printed on the label at the bottom of the router.

**TP-LINK**

Wireless Password /PIN   XXXXXXXX

SSID   TP-LINK_XXXX

b Click the network icon of your computer or go to Wi-Fi Setting of your smart device, and then select the SSID to join the network.

Login

B Follow the step-by-step instructions of the Quick Setup to complete the initial configuration.

Note: If you are not sure of the **WAN Connection** Type, please click **Auto Detect**.

Quick Setup - WAN Connection Type

The Quick Setup is preparing to set up your internet connection, please choose one type below according to your ISP. The detailed description will be displayed after you choose the corresponding type.

○ Auto-Detect
○ Dynamic IP (Most Common Cases)
○ Static IP
○ PPPoE/Russian PPPoE
○ L2TP/Russian L2TP
○ PPTP/Russian PPTP

Note: For users in some areas (such as Russia, Ukraine etc.), please contact your ISP to choose connection type manually.

More Features

The TP-LINK router is equipped with various features, such as Parental Controls, Access Control, etc.

You can log into the router's web management page **http://tplinkwifi.net** to apply these functions. For instructions, please refer to the **User Manual** at **www.tp-link.com**.

FAQ (Frequently Asked Questions)

Q1. What can I do if the login window does not appear?

- If the computer is set to a static or fixed IP address, change the setting to obtain an IP address automatically.
- Verify that **http://tplinkwifi.net** is correctly entered in the web browser. Alternatively, enter **http://192.168.0.1** or **http://192.168.1.1** in the web browser and press **Enter**.
- Use another web browser and try again.
- Reboot your router and try again.
- Disable then re-enable the network adapter being used.

Q2. What can I do if I cannot access the Internet?

- Check if the Internet is working properly by connecting a computer directly to the modem using an Ethernet cable. If it is not, contact your Internet Service Provider.
- Log into the web management page of the router, and go to the **Status** page to check whether the WAN IP address is valid or not. If it is, please run the Quick Setup again; otherwise, recheck the hardware connection.
- Reboot your router and try again.
- For cable modem users, log into the Web Management page of the router. Go to **Network > MAC Clone**, click **Clone MAC Address** and click **Save**. Then reboot both the modem and the router.

Q3. How do I restore the router to its factory default settings?

- With the router powered on, press and hold the Reset button on the back until the Power LED starts blinking.
- Log into the web management page of the router. Go to **System Tools > Factory Defaults**, and click **Restore**. The router will restore and reboot automatically.

Q4. What can I do if I forgot my web management password?

- Refer to FAQ > Q3 to reset the router, and then use **admin** (all lowercase) for both username and password to log in.

Q5. What can I do if I forgot my wireless network password?

- The factory default Wireless Password is printed on the label of the router.
- Connect a computer directly to the router using an Ethernet cable. Log into the router's web management page, and go to **Wireless > Wireless Security** to obtain or reset your wireless password.
