Hardware Connection

Connect the devices as follows. The power LED will light up and the hub is ready to use.

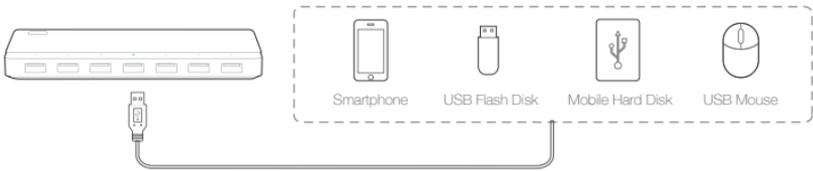

- Usage Tips:**
1. The TP-LINK USB 3.0 hub is plug-and-play and requires no driver for Windows, Mac OS X or Linux systems.
 2. The hub is automatically turned on every time you plug the power adapter into a power outlet.
 3. The hub can transfer data even when the power adapter is unplugged. In this mode, the power button will not work as a power switch any more.
 4. To prevent possible data loss or corruption, avoid unplugging or plugging the power adapter when transferring data or charging.

Using the Hub

Transferring Data

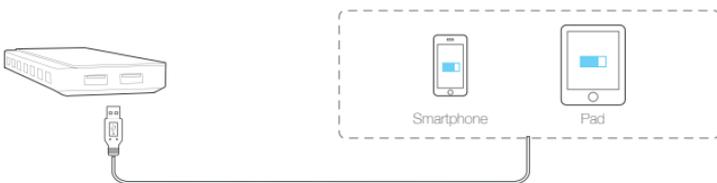

This hub provides your computer with 7 additional USB 3.0 ports for super-speed USB 3.0 data transfer.

- Usage Tips:**
1. The USB 3.0 ports are also compatible with USB 2.0 and USB 1.1 specifications.
 2. The USB 3.0 ports transfer data at a rate up to 5Gbps, but the actual rate is limited by the USB transfer rate of the connected devices.
 3. The performance of 2.4GHz wireless devices (wireless keyboards, mice, etc.) may be affected when they are working too close to USB 3.0 devices.

Charging

This hub provides two charging ports with a maximum current of 2.4A to quickly charge all kinds of mobile devices such as Android, Apple and Windows products.

- Usage Tips:**
1. If your device's current is less than 2.4A, the charging port can automatically adjust its current supplied to your device to avoid damage.
 2. The charging ports are for charging your mobile devices only with no data transfer.
