AC3200 Wireless Tri-Band Gigabit Router

Archer C3200

7106505511   REV1.0.2

1 Place the router horizontally and extend the antennas to the maximum angle.

Note: For best performance, horizontal installation is recommended. Antenna direction and position can affect performance in vertical installation situations.

Router

5 Turn on the router.

Connecting the Hardware

If your Internet connection is through an Ethernet cable from the wall instead of through a DSL / Cable / Satellite modem, connect the Ethernet cable directly to the router's Internet port, then follow steps 5 and 6 to complete the hardware connection.

Internet

Modem

2 Turn off the modem, and remove the backup battery if it has one.

3 Connect the modem to the Internet port on your router with an Ethernet cable.

Power adapter

4 Turn on the modem, and then wait about **2 minutes** for it to restart.

6 Verify that the following LEDs are on and stable before continuing with the configuration.

Power On   2.4GHz On   5GHz-1 On   5GHz-2 On   Internet On

Note:
1. If all the LEDs are off, press the LED On/Off button ▭ for about 1 second, then check the LEDs again.
2. If the 2.4GHz, 5GHz-1, and 5GHz-2 LEDs are off, press the Wi-Fi On/Off button ▭ for about 2 seconds, then check the LEDs again in a few seconds.

Tether App

To conveniently manage your network, scan the QR code to download the Tether app on your mobile device.

USB Features

Use the USB ports for media sharing, storage sharing and printer sharing across your local network. You can also set up an FTP server to access your files remotely through the Internet.

Configuring the Router

1. Connect your computer to the router (wired or wireless).

Wired

Turn off the Wi-Fi on your computer and connect the devices as shown below.

Ethernet cable
Wireless

Connect wirelessly by using the SSIDs (network names) and Wireless Password printed on the product label at the bottom of the router.

You can also connect by pressing the WPS button on the front panel of the router. For more information about WPS, refer to the User Guide at www.tp-link.com.

Click Test Internet Connection below, then click Finish.
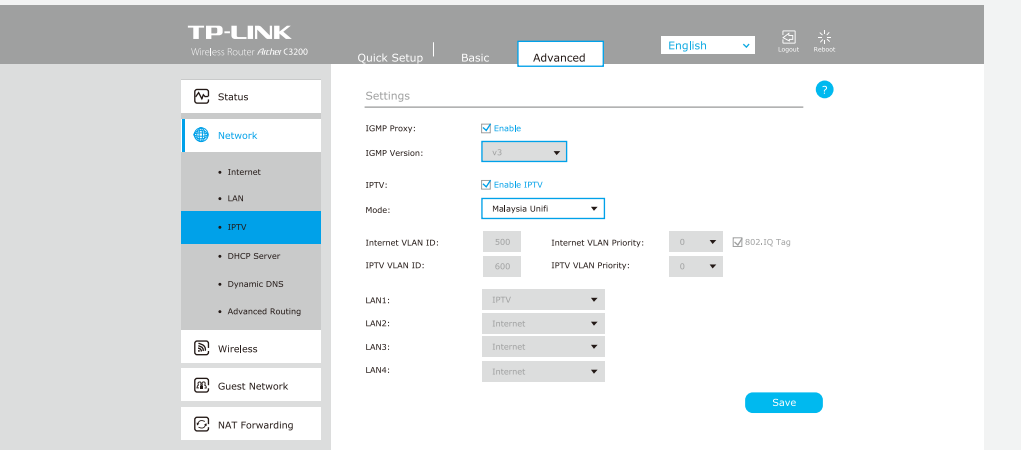

Test Internet Connection

Back   Finish

Second part is the settings of the Unifi IPTV.
Step 1 Please go to the Advance-Network-IPTV:
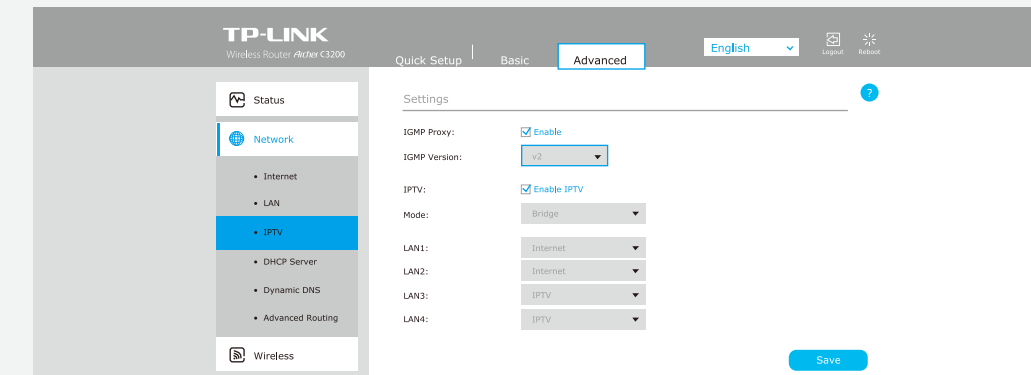

Step 2 Click Enable IPTV and choosing the mode as Malaysia Unifi, IGMP Version as V3 then click save.

Step 3 Connect your TV to LAN 1 and try the IPTV service.

FAQ (Frequently Asked Questions)

Q1. What can I do if the login page does not appear?

A1. If the computer is set to a static or fixed IP address, change the setting to obtain an IP address automatically.

A2. Verify that http://tplinkwifi.net is correctly entered in the web browser. Alternatively, enter http://192.168.0.1 or http://192.168.1.1 in the web browser and press **Enter**.

A3. Use another web browser and try again.

A4. Reboot your router and try again.

A5. Disable then re-enable the network adapter being used.

Q2. What can I do if I cannot access the Internet?

A1. Check if the Internet is working properly by connecting a computer directly to the modem using an Ethernet cable. If it is not, contact your Internet Service Provider.

A2. Log in to the Web Management page of the router, and go to **Basic > Network Map** page to check whether the Internet IP address is valid or not. If it is, please run the Quick Setup again; otherwise, recheck the hardware connection.

A3. For cable modem users, log in to the Web Management page of the router. Go to **Advanced > Network > Internet > MAC Clone**, click **Use Current Computer MAC Address** and click **Save**, then reboot both the modem and the router.

A4. Reboot your router and try again.

Q3. How do I restore the router to its factory default settings?

A1. While the router is powered on, press and hold the **Reset** button on the back for about 7 seconds until all LEDs go off, then release the button.

A2. Log in to the Web Management page of the router. Go to **Advanced > System tools > Backup & Restore**, and click **Factory Restore**. The router will restore and reboot automatically.

Q4. What can I do if I forgot my web management password?

A. Refer to FAQ > Q3 to reset the router, and then use the default **admin** (all lowercase) for both username and password to log in.

Q5. What can I do if I forgot my wireless network password?

A1. The factory default Wireless Password/PIN is printed on the product label of the router.

A2. Log in to the router's Web Management page, and go to **Basic > Wireless** to obtain or reset your wireless password.
