# Hardware Installation

1. Power down your computer and unplug its power cord;

2. Open the case and locate an available PCI-E slot on the motherboard;

3. Insert the PCI Express Adapter into the PCI-E slot. Make sure that all of its pins are touching the slot's contacts. You may have to apply a bit of pressure to slide the adapter all the way in. After the adapter is firmly in place, secure its fastening tab to your computer's chassis with a mounting screw;

4. Close the case and insert the power cable into the computer, then turn on the computer.

Software Installation

If you are running **Windows 2000**, please install the device by referring to the "**Installation Guide**" part of the User Guide on the included Resource CD.

1   For Windows XP

1   Installing Adapter Driver

You may see the **Found New Hardware Wizard** when the computer boots up. This is the default setup wizard of Windows XP. For a smoother installation, **please click "Cancel" and insert the provided TP-LINK Resource CD**.
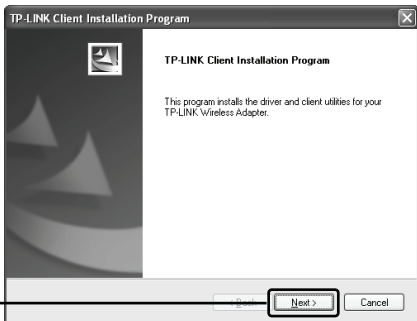

Click **Cancel**

After inserting the provided Resource CD into your CD-ROM drive, the Setup Wizard will automatically pop up on your computer's screen.
Choose **Install Driver&Utility**
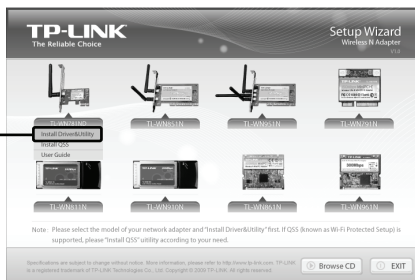

Click **Next**

Choose **Install Driver Only**

Click **Next**

Follow the step-by-step instructions to finish the driver installation.

If prompted to 'The software has not passed Windows Logo testing to verify its compatibility with Windows XP', click **Continue Anyway** to continue.

Click **Finish**

2 **Connecting to the Wireless Router/Access Point**

Note If the Wirless Router/Access Point supports **Wi-Fi Protected Setup (WPS)** function, you are recommanded to use the QSS (Quick Secure Setup) to quickly connect to your wireless network. Please refer to the **Appendix Connecting to the Wireless Router by QSS**.
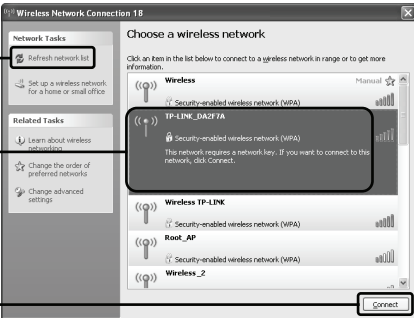

After you have successfully installed the driver software, the icon will appear on the bottom right-hand corner of your desktop.
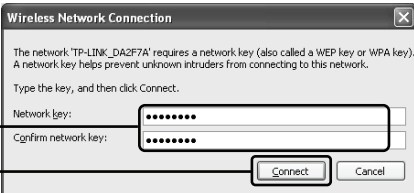

Click

Click **Refresh network list**

Select your network by the network name

Click **Connect**

Input the Network key of your wireless network

Click **Connect**

Note If you don't know the wireless network key, please consult the network administrator or log on to the setup page of your Wireless Router/Access Point with an Ethernet cable to check the wireless security settings. Please refer to the manual of your Wireless Router/Access Point or contact the manufactory's technical support for more details.

You have now successfully connected to your wireless network.
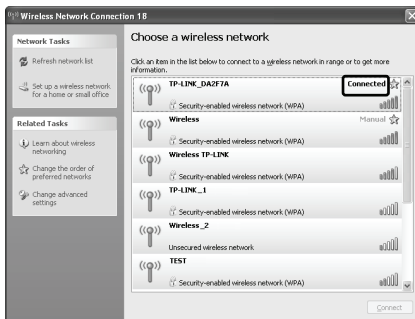

If your network is an unsecured network, you will not be prompted to input the Network key. It will connect to your network automatically.

2 For Windows Vista

1 Installing Adapter Driver

You may see the **Found New Hardware Wizard** when the computer boots up. This is the default setup wizard of Windows Vista. For a smoother installation, **please click "Cancel" and insert the provided TP-LINK Resource CD**.

Click **Cancel**

After inserting the provided Resource CD into your CD-ROM drive, the Setup Wizard will automatically pop up on your computer's screen.
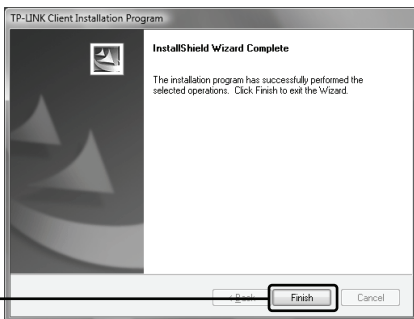

Choose **Install Driver&Utility**
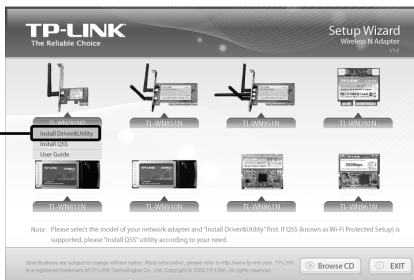

Click **Next**

Follow the step-by-step instructions to finish the driver installation.
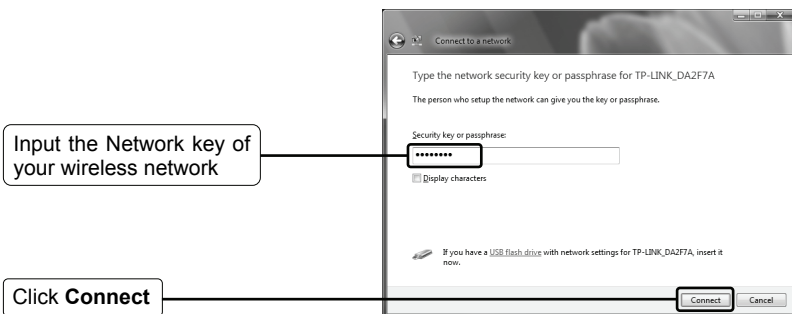

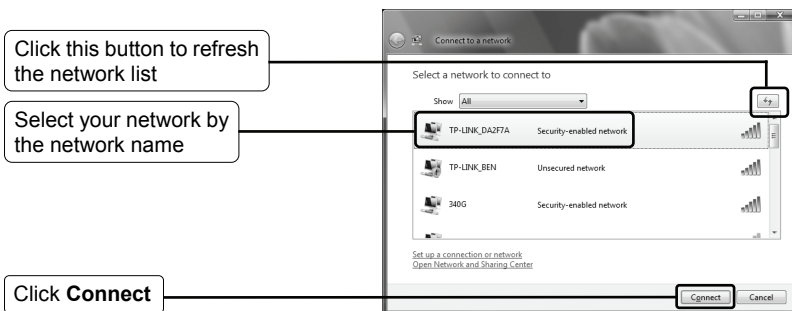

If prompted to 'Windows can't verify the publisher of this driver software', click **Install the driver software Anyway** to continue.

Click **Finish**

**2** **Connecting to the Wireless Router/Access Point**

Note If the Wirless Router/Access Point supports **Wi-Fi Protected Setup (WPS)** function, you are recommanded to use QSS (Quick Secure Setup) to quickly connect to your wireless network. Please refer to the Appendix **Connecting to the Wireless Router by QSS**.

Currently connected to:

TP-LINK-TEST3_Network
Access: Local only

Connect to a network
Network and Sharing Center

Click this icon at the bottom right of the desktop and then click **Connect to a network**

Connect to a network

Select a network to connect to

Show All

Click this button to refresh the network list

Select your network by the network name

TP-LINK_DA2F7A   Security-enabled network

TP-LINK_BEN   Unsecured network

340G   Security-enabled network

Set up a connection or network
Open Network and Sharing Center

Click **Connect**

Connect   Cancel

Connect to a network

Type the network security key or passphrase for TP-LINK_DA2F7A

The person who setup the network can give you the key or passphrase.

Security key or passphrase:

••••••••

Display characters

Input the Network key of your wireless network

If you have a USB flash drive with network settings for TP-LINK_DA2F7A, insert it now.

Click **Connect**

Connect   Cancel

Note If you don't know the wireless network key, please consult the network administrator or log on to the setup page of your Wireless Router/Access Point with an Ethernet cable to check the wireless security settings. Please refer to the manual of your Wireless Router/Access Point or consult the manufactory's technical support for more details.

You have now successfully connected to your wireless network.

Save this network for automatically connecting

Connect to a network

Successfully connected to TP-LINK_DA2F7A

☑ Save this network
☑ Start this connection automatically
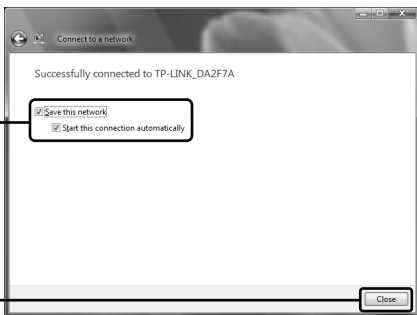

Click **Close**

Close

Note If your network is an unsecured network, you will not be prompted to input the Network key. It will connect to your network automatically.
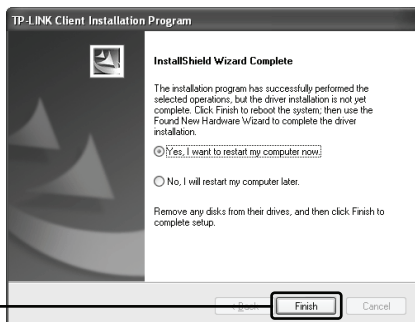

1 Installing the QSS Driver

Click **Install QSS**

Follow the step-by-step instructions to finish the QSS installation.

Click **Finish**

2 Connecting to the Wireless Router

Double click the icon on the desktop to open the QSS Utility, and this page will display.
Click **Next**

Select **Enter the PIN from my access point**

Input the **PIN** printed on the back of the Router
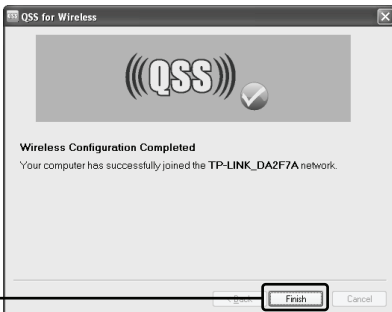

Click **Next**

Wait for the Adapter to connect to the Wireless Router.

Click **Finish** to complete the connection.

Click **Finish**
