Solutions

- VIGI C430 × 624
- VIGI NVR1004H × 156
- VIGI Cloud VMS

69 branches successfully installed by June 16, 2025 (including 69 NVRs and 257 cameras); still ongoing

VIGI delivers a comprehensive video surveillance solution for Moneyboxx Finance Limited—a fast-growing Indian NBFC that provides unsecured business loans to micro-enterprises in Tier 2 and Tier 3 cities. The system ensures secure and reliable operations across Moneyboxx's entire branch network.

Centralized Video Management and Scalable Projects via VIGI Cloud VMS

Moneyboxx Finance Limited operates extensive branches across Tier 2 and Tier 3 cities to better serve its customers. This requires a surveillance system that ensures local security while enabling centralized management from the headquarters. With VIGI Cloud VMS, administrators can effortlessly manage devices, monitor live feeds, review recordings, and receive real-time alerts via the VIGI app, Web Portal, or PC Client—all without the need for a VPN.

Additionally, multi-user privilege management enables assigning roles (e.g., Admin, Viewer, Live Only) to members at each branch, ensuring access is limited to necessary resources. This simplifies maintenance and reduces administrative burden.

As the company rapidly expands, the surveillance system must scale seamlessly. VIGI Cloud VMS enables new site deployment in just 6 minutes, eliminating the need for local front-end deployment, VPN configurations, or IT maintenance—significantly cutting project costs.

## Precision Surveillance Through High-Resolution Imaging and Customized Solutions
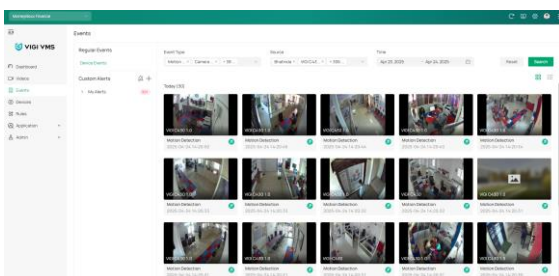

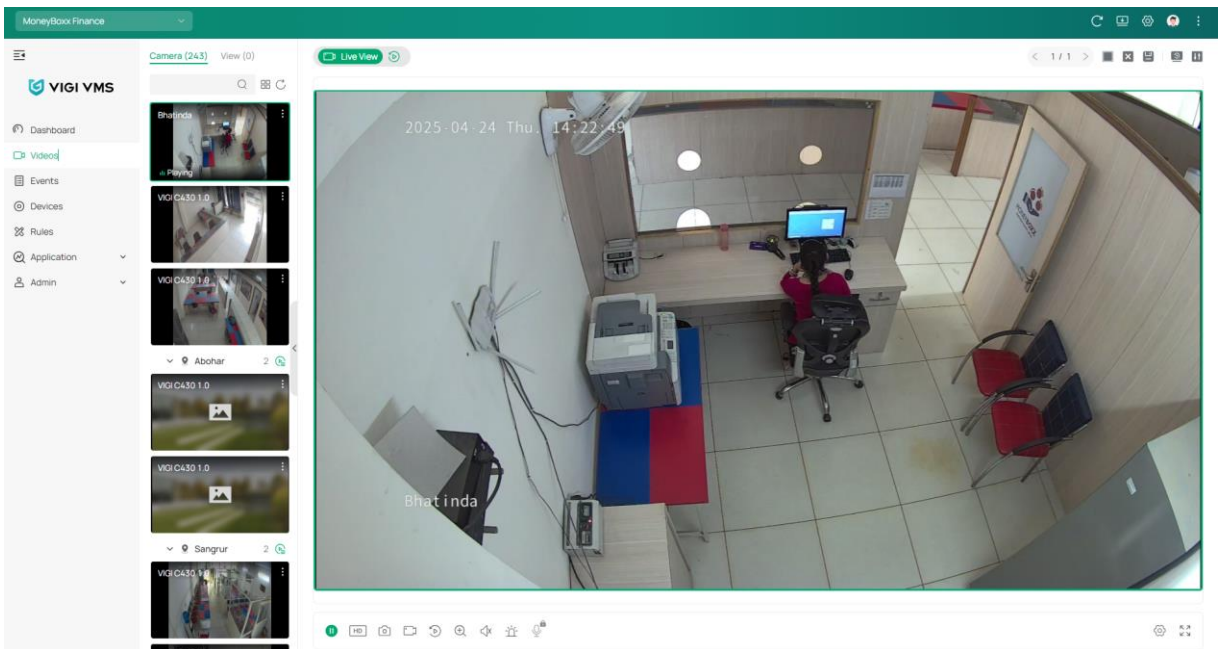

VIGI cameras feature advanced Smart Detection, including Intrusion Detection and Abnormal Sound Detection, enhanced by Human & Vehicle Classification technology for more accurate real-time alerts. To further deter intruders, the cameras come equipped with a built-in white light, actively reinforcing security and ensuring maximum protection for branch offices.
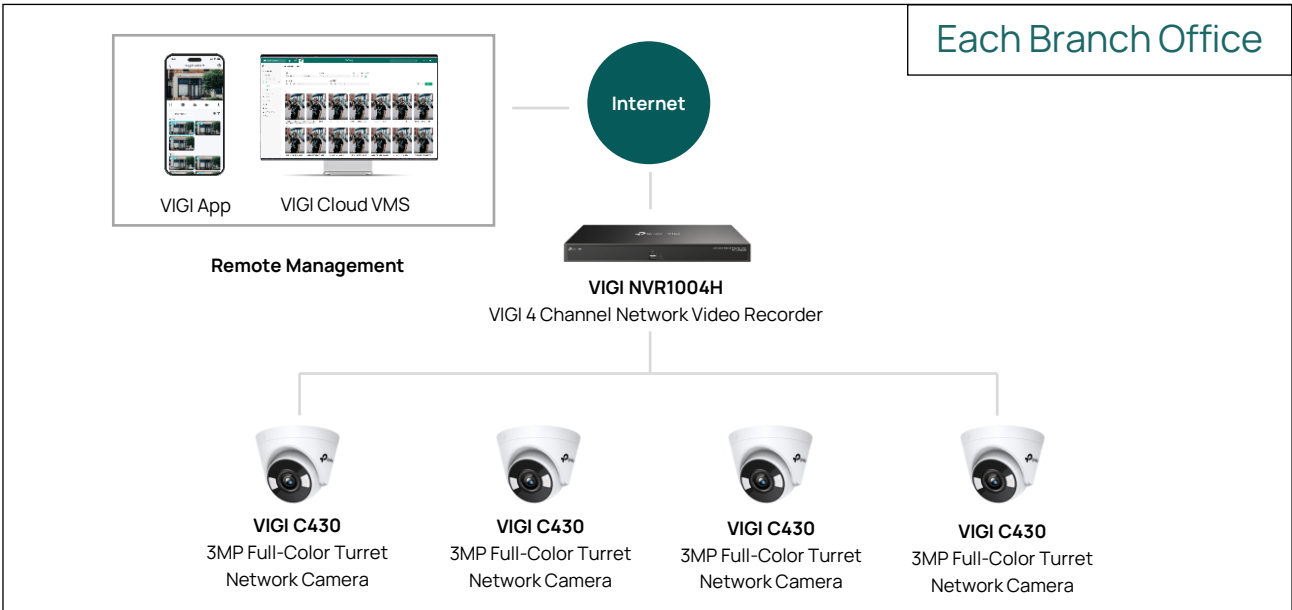

All detected events can be stored via the NVR and searched through VIGI Cloud VMS, enabling efficient incident investigation and compliance tracking while enhancing operational transparency and employee accountability.

Fast Installation with PoE to Minimize Downtime and Maximize Security

VIGI C430 cameras support PoE (Power over Ethernet), requiring only a single network cable for both power and data transmission—eliminating additional wiring. Each Moneyboxx branch office deployed four C430 cameras paired with one NVR. The quick and easy installation minimized system downtime, ensuring uninterrupted business operations.

As a cost-effective and reliable security solution, VIGI fully met Moneyboxx's operational requirements.
