

VIGI Ensures Security for a Gun Shop in Poland

Project Scope

Provide a reliable surveillance system for one store

Customer Profile

Name: Guns Concept, Sp. z o.o.
Industry: Retail
Location: Warsaw, Poland

Solutions

- VIGI C240 × 5
- VIGI NVR1008H × 1
- TL-SF1009P × 1
- VIGI Cloud VMS

[Guns Concept](#) is a gun shop located in [Warsaw, Poland](#). The shop offers a wide selection of firearms, ammunition, optics, and shooting accessories. Due to the nature of the business, the store introduced the VIGI security system to ensure security.

Comprehensive 24/7 Security: Smart Detection & Instant Alerts to Protect Critical Assets

The store deployed five VIGI C240 dome cameras featuring 4MP resolution and a 2.8mm focal length, to provide detailed, full-color images even in complete darkness.

The cameras were placed throughout the exhibition and retail space, as well as in the weapons warehouse, ensuring truly comprehensive protection. With smart event detection (including region entering/exiting detection, abnormal sound detection, and more) and instant notifications, the store manager can be notified immediately to avoid potential dangers. Additionally, the IK10 vandal-proof rating ensures constant security at all times and long-term durability for worry-free operation.

Secure & Continuous Recording: Reliable Storage for Essential Video Evidence

Continuous video surveillance is recorded on a VIGI NVR1008H recorder, which supports a hard drive of up to 16TB and utilizes advanced H.265+ encoding. This enables high-resolution footage to be stored for several months without being overwritten, providing secure and reliable video evidence. Additionally, the entire system can be managed remotely via the VIGI Cloud VMS or the VIGI app, offering convenient access and control and enabling easy review of any suspicious activity on the premises.

Simplified Surveillance & Hassle-Free Operation with PoE Technology

With a 9-port PoE+ SF1009P switch, which powers the cameras via a single network cable. This solution accelerates surveillance deployment and simplifies the network infrastructure.

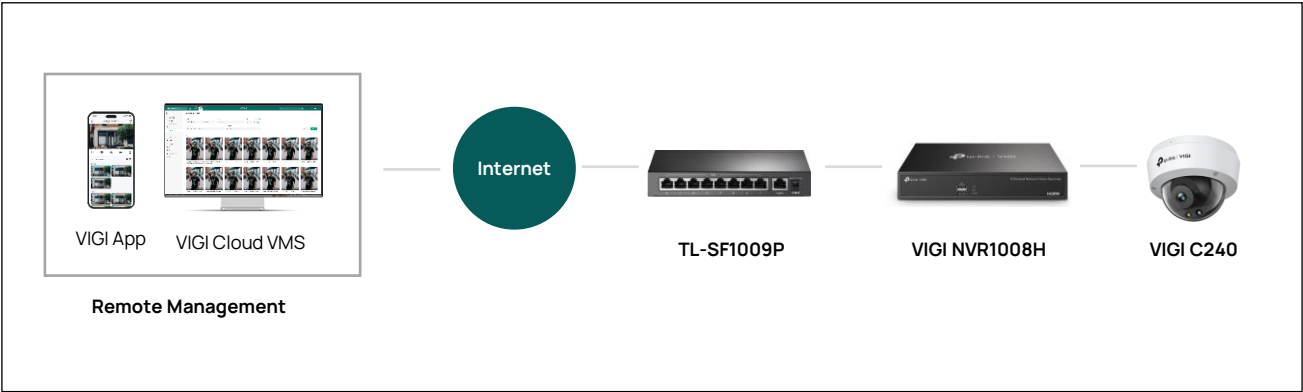

VIGI's professional sales team provides tailored solutions for rapid, stable deployment, while high-performance cameras deliver reliable, maintenance-free operation for a hassle-free experience.

“

The installed CCTV monitoring system fully meets our expectations. The image is clear, and the active protection function – which activates fill-in diodes upon motion detection – works perfectly as additional lighting for the showroom during opening and closing, thus facilitating our day-to-day operations.

—Karol Bogusz, co-owner of Guns Concept
