

This firmware fully adapts the Omada SDN platform but only compatible with Omada Controller v4.3.x or above.

New Feature/Enhancement:

1. First firmware for EAP670 v1 and v1.6.
2. Fully adapt to Omada SDN controller.

Notes:

1. For EAP670 v1 and v1.6.
2. This version of firmware is applied to the Omada APP of version 3.0.X or above.
3. **This firmware is only compatible with Omada controller v4.3.x or above. If you are using the old Omada controller and need to manage EAP670, you must upgrade the Omada controller to version 4.3.x or above. You can follow [Omada Controller Upgrade Guide](#) to upgrade omada controller.**
