

This firmware fully adapts the Omada SDN Controller v5 but only compatible with Omada Controller v4.1.5 or above.

New Feature/Enhancement:

1. First firmware for EAP610-Outdoor v1.
2. Add accounting function for MAC authentication.
3. Remove support for WEP, TKIP, including Standalone mode.
4. Support FacebookV2 function in Controller mode.
5. Support PPSK function in Controller mode.
6. Optimized the function of the Controller for Mesh Failover.
7. 2.4G change 20/40MHz to Auto, 5G change 20/40/80MHz to Auto, and the Channel Width in the corresponding device details page is also displayed as Auto.
8. The wmm enable switch is hidden on the webUI, and the wmm switch is turned on uniformly for old software upgrades and importing old configurations.
9. Optimize the detection mechanism of the Rest button.

Notes:

1. For EAP610-Outdoor v1 only.
2. This version of firmware is applied to the Omada APP of version 3.0.X or above.
3. **This firmware is only compatible with Omada controller v4.1.5 or above. If you are using the old Omada controller and need to manage EAP610-Outdoor, you must upgrade the Omada controller to version 4.1.5 or above. You can follow [Omada Controller Upgrade Guide](#) to upgrade omada controller.**
