**This firmware is fully adapted to Omada SDN Controller V5.1.**

**New Feature/Enhancement:**

1. Added support for Accounting for MAC authentication.

2. Removed support for WEP and TKIP.

3. Added support for Facebook Wi-Fi v2 in Controller mode.

4. Added support for PPSK function in Controller mode.

**Bug fixed:**

1. Fixed the bug that logs of the clients connected to VLAN SSID were not sent.

2. Fixed the bug that clients were not redirected to the Portal page when trying to access EAP through the EAP's IP address.

**Notes:**

1. For EAP115 v4 and v4.6.

2. This version of firmware is fully applied to the Omada APP of version 4.2.X or above.
