

## How to update the firmware of Powerline ac Adapters via web-based management interface?

TP-LINK is dedicated to improving and enriching the product features, giving you a better network experience. We will release the latest firmware at TP-LINK official website (<http://www.tp-link.com>). You can download and upgrade the latest firmware for your device.

**To update the firmware, follow the steps below:**

### Step 1

Decompress the package to obtain the update file(s).

For a wireless powerline adapter, you may obtain a combination of **BIN file**.

Name	Date modified	Type
 wpa8630v1_1_0_2_up(160529).bin	5/29/2016 3:40 PM	BIN File

**Note:** The upgraded firmware version must correspond to the hardware.

### Step2

Please refer to [How to log into the web-based management interface of Powerline ac Extender?](#)

### Step3

Go to **System Tools > Firmware Upgrade** page.

#### Firmware Upgrade

New Firmware File:

Browse

Firmware Version:

1.0.1 Build 151010 Rel.55938n

Hardware Version:

TL-WPA8630 v1 00000000

Upgrade

### Step4

Click **Browse** to locate the downloaded new firmware file, and click **Upgrade**. Wait a few minutes for the upgrading and rebooting.

**Note:**

1. Before upgrading the firmware, it's better to back up your current settings. Click **Backup** to save a copy of the current settings to your local computer. A **config.bin** file will be stored to your computer.

Backup

Save a copy of your current settings.

Backup

2. During the upgrading process, do not turn off or reset the extender.

**Get to know more details of each function and configuration please go to [Download Center](#) to download the manual of your product.**
