

This firmware is fully adapted to Omada SDN Controller v5.5

New Feature/Enhancement:

1. Optimized the judgment logic of Large Ping Attack log.

Bug Fixed:

1. Fix the bug that Bandwidth Control would cause the device to go down.
2. Fix the bug that Bandwidth Control would cause 100% CPU usage for a long time.
3. Fix the bug that the maximum bandwidth limit of Bandwidth Control configuration only supports 1G in Standalone mode.
4. Fix DHCP related issues:
 - Clients may not be able to obtain IP addresses.
 - Address reservation is not effective for IoT devices.
5. Fix the bug that when all ports except USB Modem were checked as WAN, the device rebooted directly and could not be accessed after reboot.
6. Fix the bug that OpenVPN cannot be used with ER605 v1.

Notes:

Your device's configuration won't be lost after upgrading.
