

**This firmware fully adapts the Omada SDN Controller v5 but only compatible with Omada Controller v4.1.5 or above.**

New Feature/Enhancement:

1. Supports IPv6.
2. Supports features for Ping, Traceroute, Packet Capture, Terminal, and Device Info.
3. Supports LocktoAP function.
4. Supports LLDP (Link Layer Discovery Protocol).
5. Supports rate limit of whole SSID.
6. Supports Band2 and Band3 channels.
7. Improved stability.

**Notes:**

1. For EAP660HD (JP) v1 only.
2. This version of firmware is applied to Omada APP of version 4.0.X or above.
3. This firmware is only compatible with Omada controller v4.1.5 or above. If you are using the old Omada controller and need to manage EAP660HD, you must upgrade Omada controller to version 4.1.5 or above. You can follow [Omada Controller Upgrade Guide](#) to upgrade omada controller.
