Bug fix	Fix QA issue : When doing power on-off test, it has a probability of abnormal stuck during reboot

FirmwareVersion	1.1.0 3.1.4 v607c.0 Build 230209 Rel.48987n
Base Firmware Version	1.0.0 3.1.4 v607c.0 Build 221226 Rel.24939n
Bug fix	Fix QA issue: 1. After the DSL dial-up is successful, the EWAN port connects to

	the Server on the premise that the DSL port is still trained for connection. In this case, disconnect the EWAN connection, DSL will fail register
	2. After LED Control take effect, and LAN LED still on, it should be off
	3. On the Basic Wireless Clients page, the wireless client is undefined
	4. The Oneplus9 Pro mobile phone cannot roaming from 2.4G to 5G
	5. Cannot set WanPPPConnection parameter to enable via ACS
	6. Cannot set MRU via ACS
