

Recommended Controller Software Version: Omada Controller v5.7 or above

New Features/Enhancements:

1. Improved the stability of the MAC Filter function.
2. Improved compatibility with Omada Controller.
3. Improved stability of Cloud connectivity.
4. Improved security performance.
5. Added support for MAC-Based Authentication with encrypted SSID.
6. Added support for the NTP time synchronization function of the Controller.
7. Added support for MAC authentication billing function.
8. Added support for Standalone Mesh function.

Bug Fixed:

1. Fixed the MAC address conflict problem.
2. Fixed the issue where the AirPrint client would be unable to be found through Bonjour protocol after being online for a period of time.

Note:

1. This version of firmware is applied to Omada APP of version 4.10.X or above.
2. This firmware is fully adapted to Omada SDN Controller v5.5 or above. If you are using the old Omada Controller and need to manage EAP223, you must upgrade the Omada Controller to v5.5 or above.
