

Recommended Controller Software Version: Omada Controller v5.9 or above

New Features/Enhancements:

1. Supports IPv6.
2. Supports Bonjour protocol.
3. Supports Multiple RADIUS servers.
4. Supports diagnose tools function, including Ping, Traceroute, Packet Capture, Terminal, and Device Info.
5. Supports "Lock to AP".
6. Support reporting RADIUS username.
7. Supports Multicast/Broadcast Management.
8. Supports PMF (Protected Management Frames).
9. Supports LLDP (Link Layer Discovery Protocol).
10. Supports SSID Rate Limit.
11. Improves wireless stability.

Bug Fixes:

1. Fixes some issues where PPSK with RADIUS works abnormally in some scenarios
2. Fixes the issue where Portal can't pop up when clients connect to the SSID with Dynamic VLAN and Portal both configured.
3. Fixes the issue where clients connect to the same dynamic VLAN with the same SSID can't ping each other through IPv6.

Notes:

1. This version of firmware is applied to the Omada APP v4.10 or above.
