

Recommended Controller Software Version: Omada Controller v5.9 or above

New Features/Enhancements:

1. Optimize channel deployment
2. Improved stability.

Bug fixed:

1. Fixes the issue that memory leaks in some scenarios
2. Fixes the issue that Url Filter and ACL cannot take effect correctly.
3. Fixes the issue that CoA function fails in some scenarios

Notes:

1. This version of firmware is applied to the Omada APP v4.10 or above.
