

Version Info:

Firmware for ES205GP(UN) 1.0 and 1.6. This firmware is fully adapted to Omada Controller V5.15.20 .

New Features:

1. Add support for EEE in standalone mode.
2. Add support for ONVIF discovery in controller mode.
3. Add support for traffic-based IPC identification in controller mode.
4. Add support for cable test in controller mode.
5. Add support for QoS for VLAN in controller mode.

Enhancements:

1. Optimize the login page redirection logic in standalone mode to strongly prompt users to change their account password by default.
2. Add support for individual deployment for port configuration in standalone mode.
