Recommended Controller Software Version: Omada Controller v5.9 or above

New Features/Enhancements:

1. Supports the Mesh feature.
2. Supports VoIP hook/unhook status reporting.
3. Supports VoIP registration with single-digit numbers. (Requires Controller version 5.14.32 or above)
4. Improved the stability of VoIP features.
5. Enhanced wireless stability.

Bug fixed:

1. Fixed the issue that PON long light transmission caused communication failures in specific scenarios.
2. Fixed the issue that some iOS devices could not connect to hidden SSIDs when Band Steering was enabled.
3. Fixed compatibility issues with specific wireless clients.

Notes:

1.This version of firmware is applied to the Omada APP v4.10 or above.
