

**Version Info:**

**Firmware for SG6654X(UN) 1.0. This firmware is fully adapted to Omada Controller V5.13.30.**

**SHA-256 Value:**

**a77a82bd8c7765bcfe6dfb6a9c38c016ec26f509750a68e8d3c9c6e0d296bc76**

**SHA-512 Value:**

**dd52c5c2b114fa4fc8070fdf710eb0c9821e9fa3114467d9b088bf5b05232a6d5b9d2a0f5d  
216d2c2509576ab525c411157b3e3ef8ac53d9564173256f89bdb3**

**Enhancement:**

1. Support using more characters when configuring RADIUS server key.

**Bug fixed:**

1. Fixed the issue that the default route config is occasionally lost when the master-member switches reversal happens on stacked devices under controller mode.
