Version Info:

1. After upgrading to this version, downgrading is not possible.

2. After upgrading to this version, ONVIF over TLS and RTSP over TLS are disabled by default. However, the upgrade will not affect your existing configurations.

New Features:

1. Added customizable settings for Light Alarm and Sound Alarm.

2. Added support for more flexible event detection area configuration.

3. Added support for detection rule in Smart Frame.

4. Added support for web playback from SD card storage.

5. Added support for VIGI VMS Auto Snapshot.

6. Added support for advanced encryption for ONVIF and RTSP.

7. Added support for log server.

8. Added support for the Arabic language on the web interface.

Enhancements:

1. Optimized Object Filter configuration experience in Event Settings.

2. Optimized the web initialization process.

3. Custom Audio feature of Sound Alarm supports wav and mp3 format audio.

4. Optimized remote live view and playback performance for VIGI APP and VMS.

5. Optimized mosaic display in Privacy Mask.

6. Optimized fast playback performance.

7. Optimized the unbinding rules for cloud accounts.

Bug Fixes:

1. Fixed some known issues.

2. Fixed several security issues.

3. Fixed some compatibility issues.

Notes:

1. Some RTSP or ONVIF platforms cannot support secure connections. Please check the troubleshooting guides for RTSP streaming or ONVIF control on our official website.
