New features

1. Introducing the new VI of the Omada series, including new logo, Omada domain, theme color etc.
2. Changing the name of the series to Omada Campus.
3. Removing the default username and password. A username and password need to be manually created after initiating.
4. Changing the default device location to none, default time zone to UTC.
5. Updated the default PoE power priority to follow descending order by port number starting from port 1.
6. Increased the maximum PoE output power of a single port to 90 W.

Others

1. The increase of maximum PoE output power per port applies only to devices with hardware version 1.20.
