New Features

1. Discontinued support for the ECSP v1 protocol. Adoption using older versions of the Controller is no longer supported to prevent potential security vulnerabilities.

Enhancements

None.

Bug Fixed

1. Fixed a memory leak issue reported by the market when using the SNMP feature.
2. Fixed security vulnerabilities related to the connection with the Controller.
3. Fixed an issue in stacking scenarios where an exception could occur when the MAC address table was close to full capacity and a hash collision occurred.

Others

None.
