

## **Version Info:**

### **Firmware for TL-SG108PE(UN) 5.40.**

#### Enhancements:

1. Updated the validation rules for Device Description. The Device Description field now only allows numbers, letters, and the hyphen "-", and the first and last characters cannot be a hyphen "-".

#### Bug fixed

1. Fixed a DHCP issue where transmitted DHCP packets did not fully comply with RFC 2131,
2. Fixed an IGMP issue when only one router port existed, packets sent to that port were broadcast unexpectedly.
3. Fixed a stored XSS (Cross-Site Scripting) vulnerability reported on TP-Link TL-SG108PE version 5.6.
