

Version Info:

Firmware for TL-SG1210MPE(UN) 3.40, TL-SG1210MPE(UN) 3.46, TL-SG1210MPE(UN) 3.0, TL-SG1210MPE(UN) 3.6.

New Features

None.

Enhancements

1. Modified validation rules for Device Description. Only alphanumeric characters and the hyphen ("-") are allowed, and the first and last characters cannot be a hyphen ("-").

Bug Fixed

1. Fixed a DHCP issue reported by the market where IP addresses could not be obtained with specific gateways.
2. Fixed an IGMP issue reported by the market where, when only one router port existed, sending report packets to that port caused the report packets to be broadcast.
3. Fixed a stored XSS (Cross-Site Scripting) vulnerability.

Others

None.
