

Can't find or connect to 6 GHz Wi-Fi?

Step one:

Please download the latest version of the driver at the official website <https://www.tp-link.com/support/download/>

Step two:

If the adapter still cannot find or connect to 6 GHz Wi-Fi, check the following:

1. Make sure the 6 GHz band is not prohibited by regulations in your country.
2. Make sure your router or access point supports 6GHz Wi-Fi.
3. The 6 GHz band requires operating system support. Make sure you are using the Windows 11(x64) or above.

How do I update my operating system?

To update your Windows operating system, refer to the official website to download Win 11 or later versions: <https://www.microsoft.com/software-download/>
