
Extend Your Light Strip

1. Turn off your existing light strip and unplug the power adapter.
2. Plug the light strip extension into your existing light strip. Check that it is plugged in firmly.
3. Plug in the power adapter and turn the light strip on.

Safety Information

- NOT FOR EMERGENCY LIGHTING
- Not intended for recessed installation in ceilings, or soffits.
- Only use the control provided with or specified by these instructions to control this device.
- To prevent fire danger, do not run cord behind walls, ceilings, soffits, or cabinets where it may be inaccessible for examination.
- Use only insulated staples or plastic ties to secure cords.
- The maximum distance to the receptacle is determined by the length of adapter cord.
- Keep the device away from water, fire, humidity or hot environments.
- Do not attempt to disassemble, repair, or modify the device. If you need service, please contact us.
- Do not use the device where wireless devices are not allowed.
- Do not use damaged charger or USB cable to charge the device.
- Do not use any other chargers than those recommended.
- Adapter shall be installed near the equipment and shall be easily accessible.
- Route and secure cords so that they will not be pinched or damaged when the cabinet is pushed to the wall;
- Position the portable cabinet light with respect to the cabinet so the lamp replacement markings are able to be read during replacing;
- The National Electrical Code (NEC) does not permit cords to be concealed where damage to insulation may go unnoticed. To prevent fire danger, do not run cord behind walls, ceilings, soffits, or cabinets where it may be inaccessible for examination. Cords should be visually examined periodically and immediately replaced when any damage is noted.
