01 / Set Up Your Camera

DOWNLOAD APP
Get the Tapo app from the App Store or Google Play.

STEP 1
Plug in the adapter to power up your camera.

STEP 2
Set Up
Tap the button in the app and select your model. Follow the app instructions to complete setup.

STEP 3

02 / Mount Your Camera

THE CAMERA IS NOT WATERPROOF WHEN SET ON A TABLE OR SHELF.
Mount the camera via Option 1 or 2 when installing outdoors.

Option 1: Wall Mount or Overhang Mount
1. Drill Holes
Stick the mounting template to the desired mounting place. Drill four screw holes (Φ=6mm) according to the template.

2. Mount Camera Bracket
Route the power cord through the opening of the camera bracket. Insert four mounting anchors into the holes and use the mounting screws to affix the bracket over the anchors.

3. Install Camera
Install the camera on the bracket. Use two bracket screws to affix the bracket and the camera.

Option 2: Pole Mount
Install the camera on the bracket. Use two bracket screws to affix the bracket and the camera.

Route the power cord through the opening of the camera bracket. Mount the camera on the pole using two pole-mounting loops* (loop width ≤ 12mm).

1. Mount Camera Bracket

2. Install Camera

3. Connect to Power
Connect the camera to a power outlet using the provided power adapter. Install the waterproof seal for the power connectors.

Install the waterproof cable attachments for the network interface. Make sure each part is securely attached and the waterproof rings are flush to keep out water.

Install the waterproof seal for the power connectors.

1. Connect to Power
Connect the network cable through the following components in order: fix nut, waterproof ring, and then the waterproof jacket.

2. Insert the waterproof ring into the waterproof jacket.

3. Fix the O-ring to the network interface of the camera and connect the network cables.

4. Attach the network interface with the waterproof jacket, then twist to lock. Rotate the fix nut to secure it to the waterproof jacket.

The Ethernet port connects to a network device.

Install the waterproof cable attachments for the network interface. Make sure each part is securely attached and the waterproof rings are flush to keep out water.

Connect the network cable through the following components in order: fix nut, waterproof ring, and then the waterproof jacket.

1. Connect to Power
Connect the camera to a power outlet using the provided power adapter. Install the waterproof seal for the power connectors.

2. Install Camera
Install the camera on the bracket. Use two bracket screws to affix the bracket and the camera.

The Ethernet port does not connect to a network device.

Connect the camera to a power outlet using the provided power adapter. Install the waterproof seal for the power connectors.

1. Connect to Power
Connect the network cable through the following components in order: fix nut, waterproof ring, and then the waterproof jacket.

2. Insert the waterproof ring into the waterproof jacket.

3. Fix the O-ring to the network interface of the camera and connect the network cables.

4. Attach the network interface with the waterproof jacket, then twist to lock. Rotate the fix nut to secure it to the waterproof jacket.
System LED Indication

Safety Information

- Do not use damaged charger or USB cable to charge the device.
- Do not use any other chargers than those recommended.
- Do not use the device where wireless devices are not allowed.
- Adapter shall be easily accessible.
- Avoid using the device under extreme heat conditions.
- Keep the device away from high heat or hot environments. DO NOT immerse in water or any other liquid.
- Do not disassemble or modify the product.
- Do not use the product if using the battery has been damaged. Danger of electric shock.
- Do not dismantle or change the product. Do not use the product where there are wireless devices such as radios, wireless internet, etc.
- Do not use the device in fuel depots, chemical plants or when blasting operations are in progress.
- Do not use the product in health care facilities. Hospitals or health care facilities may be using equipment that could be sensitive to external RF (radio frequency) energy.
- Do not place heavy objects on top of the product.
- When you leave the product unused for a long time unplug the product from the power outlet.
- This product may interfere with other electronic products such as TV, radios, personal computers, phones or other wireless devices.
- Adapter should be used indoor where the ambient temperature is lower than or equal to 40ºC.
- Operating Temperature: -30 ºC ~ 60 ºC (-22°F ~ 140°F)
