Power On

Configuration

Option 1: Standalone Mode

Configure and manage each EAP on its standalone page.

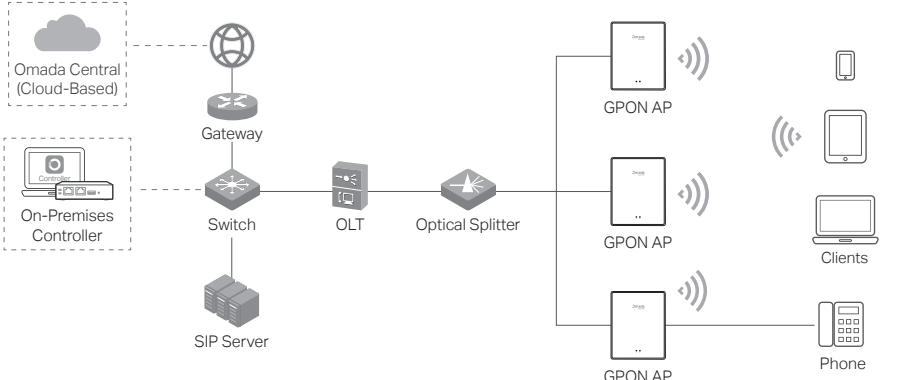

Note:

To configure the phone service (optional), go to the **Telephony** page and set up the telephone number with the information provided by your telephony service provider.

Option 2: Controller Mode

Configure and manage EAPs (and other Omada devices) centrally on an Omada Controller.

Note:

To configure the phone service (optional), launch your controller and go to **Settings > VoIP** to configure the phone service with the information provided by your telephony service provider. For detailed instructions, refer to your controller's user guide.

Omada App

With the TP-Link Omada app, you can access and manage your Omada devices at a local site or remotely with a tap of your phone.

More Configurations

For more configurations, refer to the User Guides of the Omada Controller and Omada Access Points at: <https://support.omadanetworks.com/document/>
