Option 3: Junction Box Mounting

For simplicity, an Standard US wall junction box is used as an example.

External Antenna Installation (Recommended)

Antenna Orientation

Connection

1. Grounding

2. Power On

Configuration

Option 1: Standalone Mode

Configure and manage each EAP on its standalone page.

Option 2: Controller Mode

Configure and manage EAPs (and other Omada devices) centrally with an Omada Controller.

Omada App

With the TP-Link Omada app, you can access and manage your Omada devices at a local site or remotely with a tap of your phone.

More Configurations

For more configurations, refer to the User Guides of the Omada Controller and Omada Access Points at: <https://support.omadanetworks.com/document/>

Safety Information

• Keep the device away from fire or hot environments. DO NOT immerse in water or any other liquid.
• Do not attempt to disassemble, repair, or modify the device. If you need service, please contact us.
• Do not use the device where wireless devices are not allowed.
• This EAP can be powered only by the passive PoE adapter or equipment that complies with Power Source Class 2 (PS2) or Limited Power Source (LPS) defined in the standard of IEC 62368-1.
TP-Link hereby declares that the Access Point is in compliance with the essential requirements and other relevant provisions of directives 2014/53/EU, 2011/65/EU, and (EU)2015/863. The original EU Declaration of Conformity may be found at: <https://www.tp-link.com/en/support/ce/>.
TP-Link hereby declares that the Access Point is in compliance with the essential requirements and other relevant provisions of the Radio Equipment Regulations 2017. The original UK Declaration of Conformity may be found at: <https://www.tp-link.com/support/ukca/>.
Attention: In EU member states, EFTA countries and Northern Ireland, the operation in the frequency range 5150MHz-5350MHz is only permitted indoors.
Attention: In Great Britain, the operation in the frequency range 5150MHz - 5350MHz is only permitted indoors.
For the EAP Controller, go to the **Devices** page and select the desired EAP to specify the channel.
For the web browser, go to **Wireless > Wireless Settings** to specify the channel.
